

Week 4: Arrays

Instructions

Go to

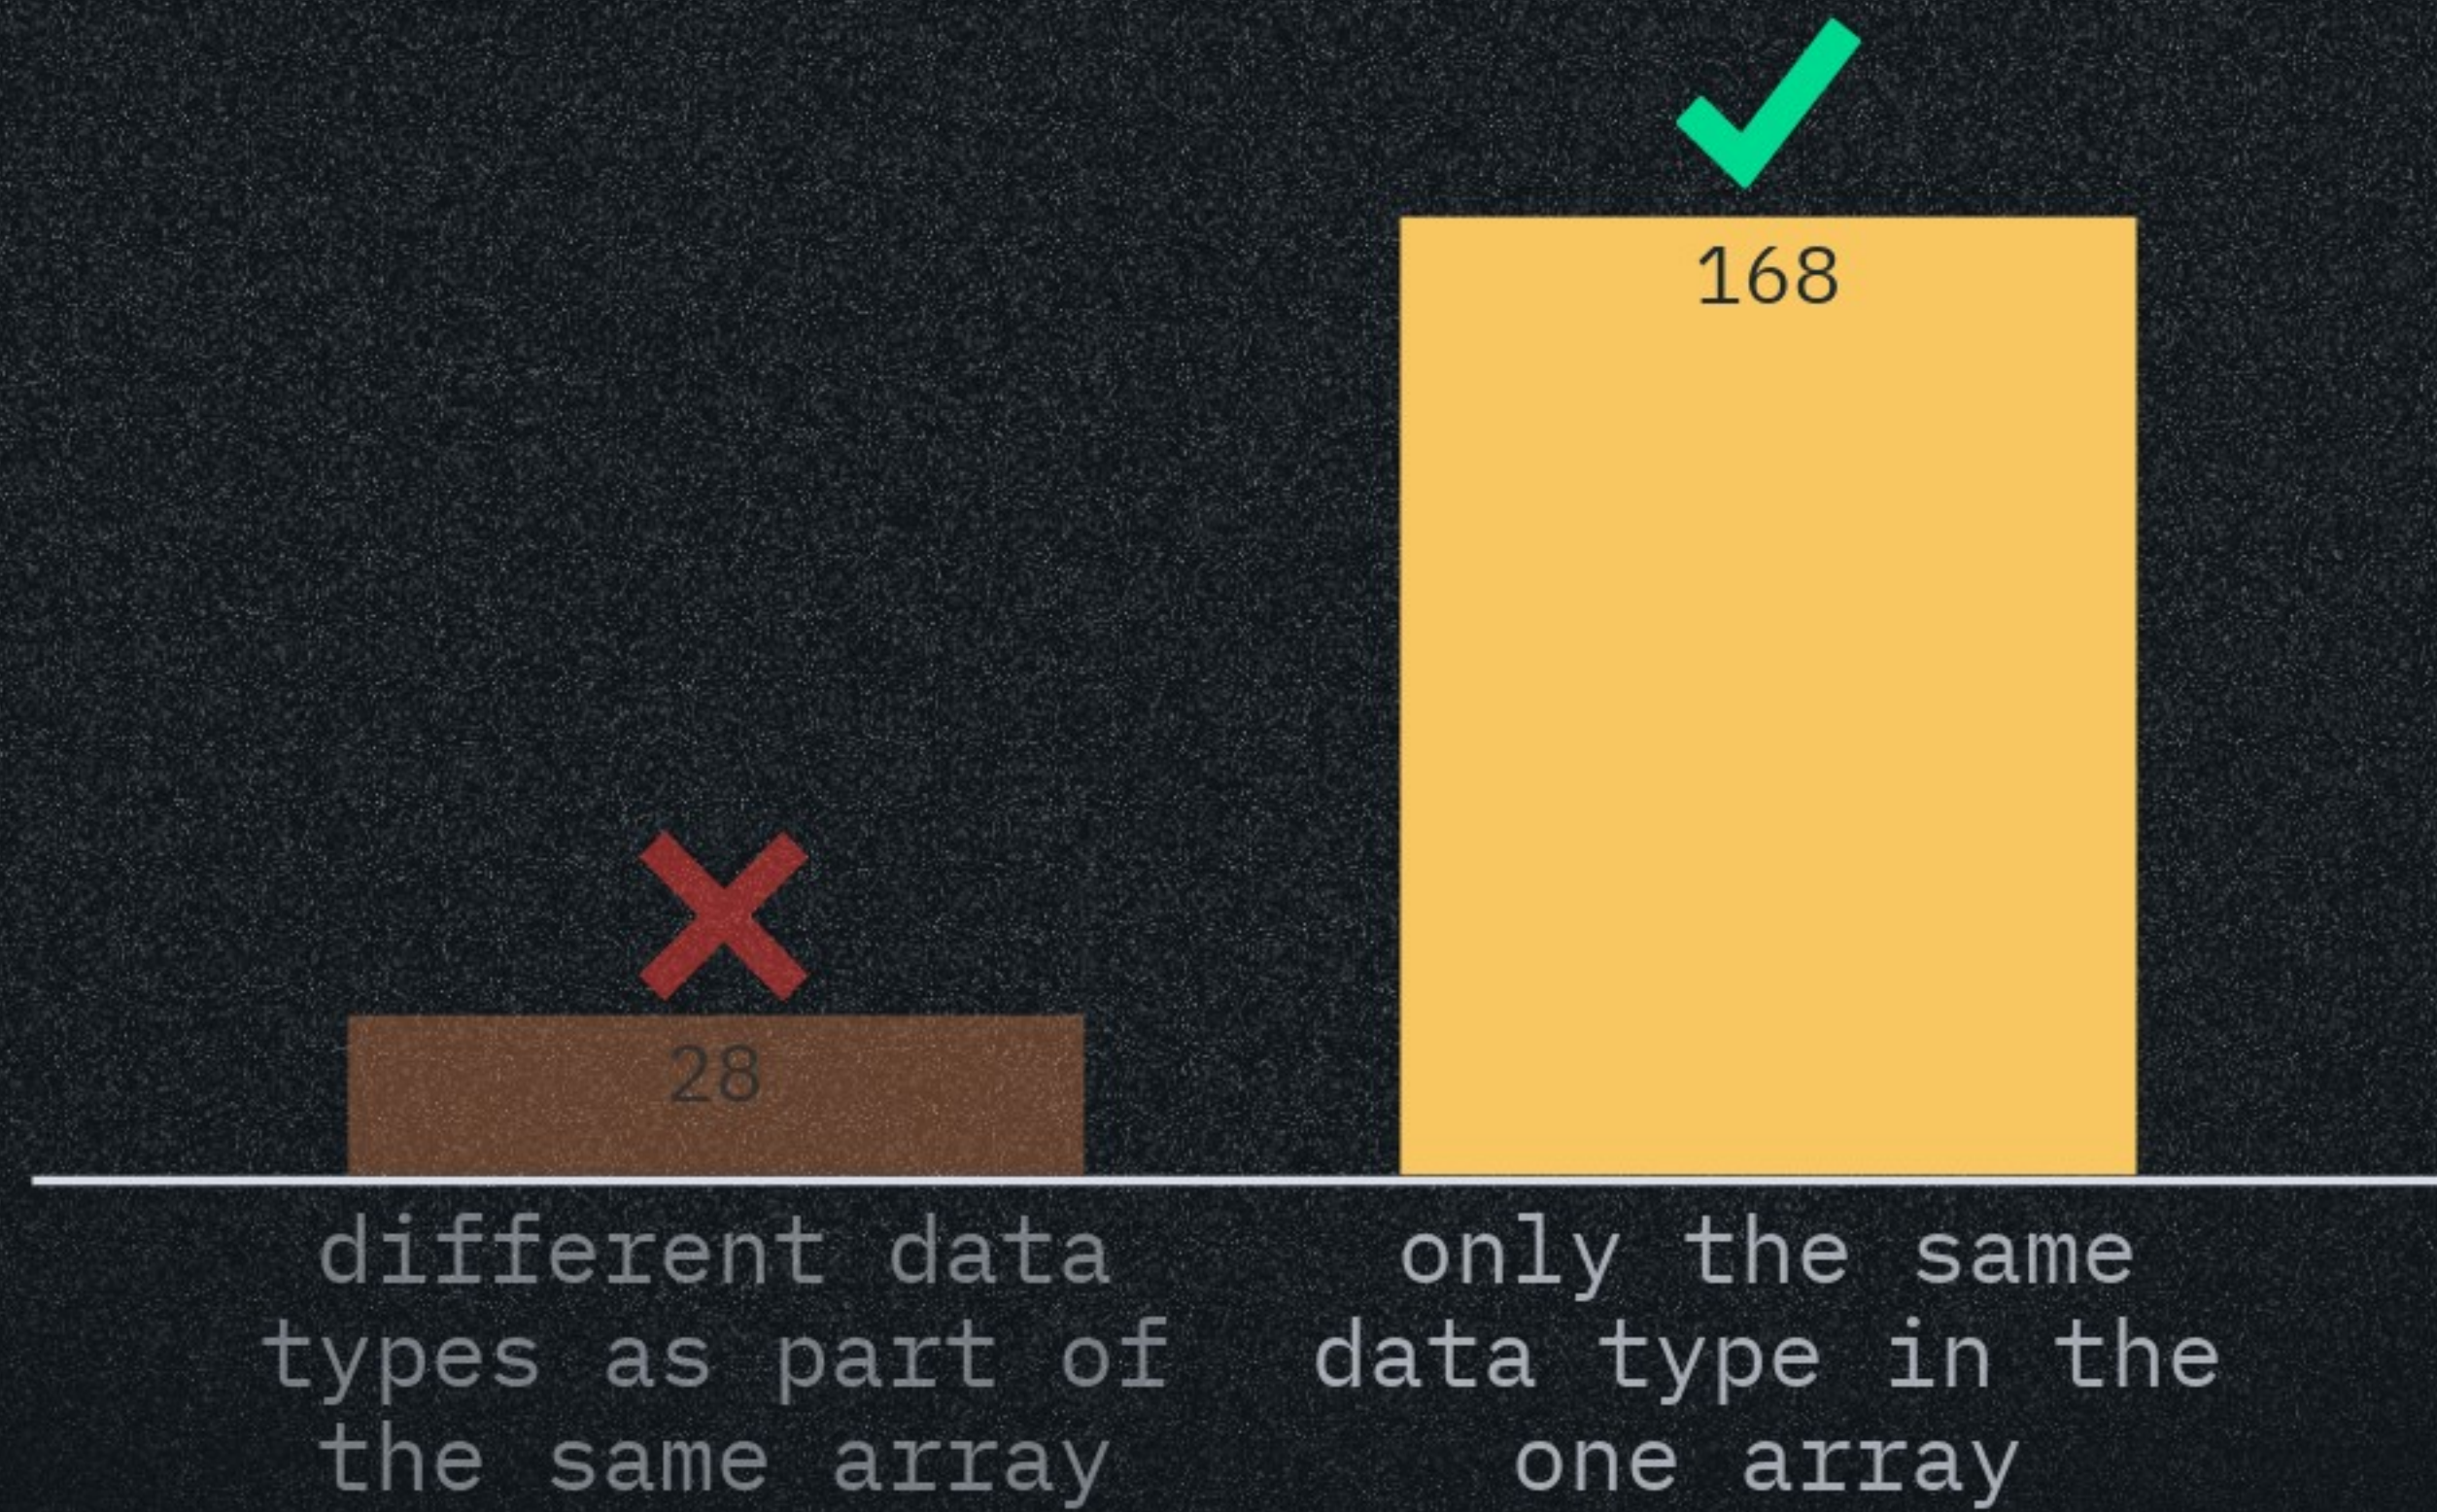

www.menti.com

Enter the code

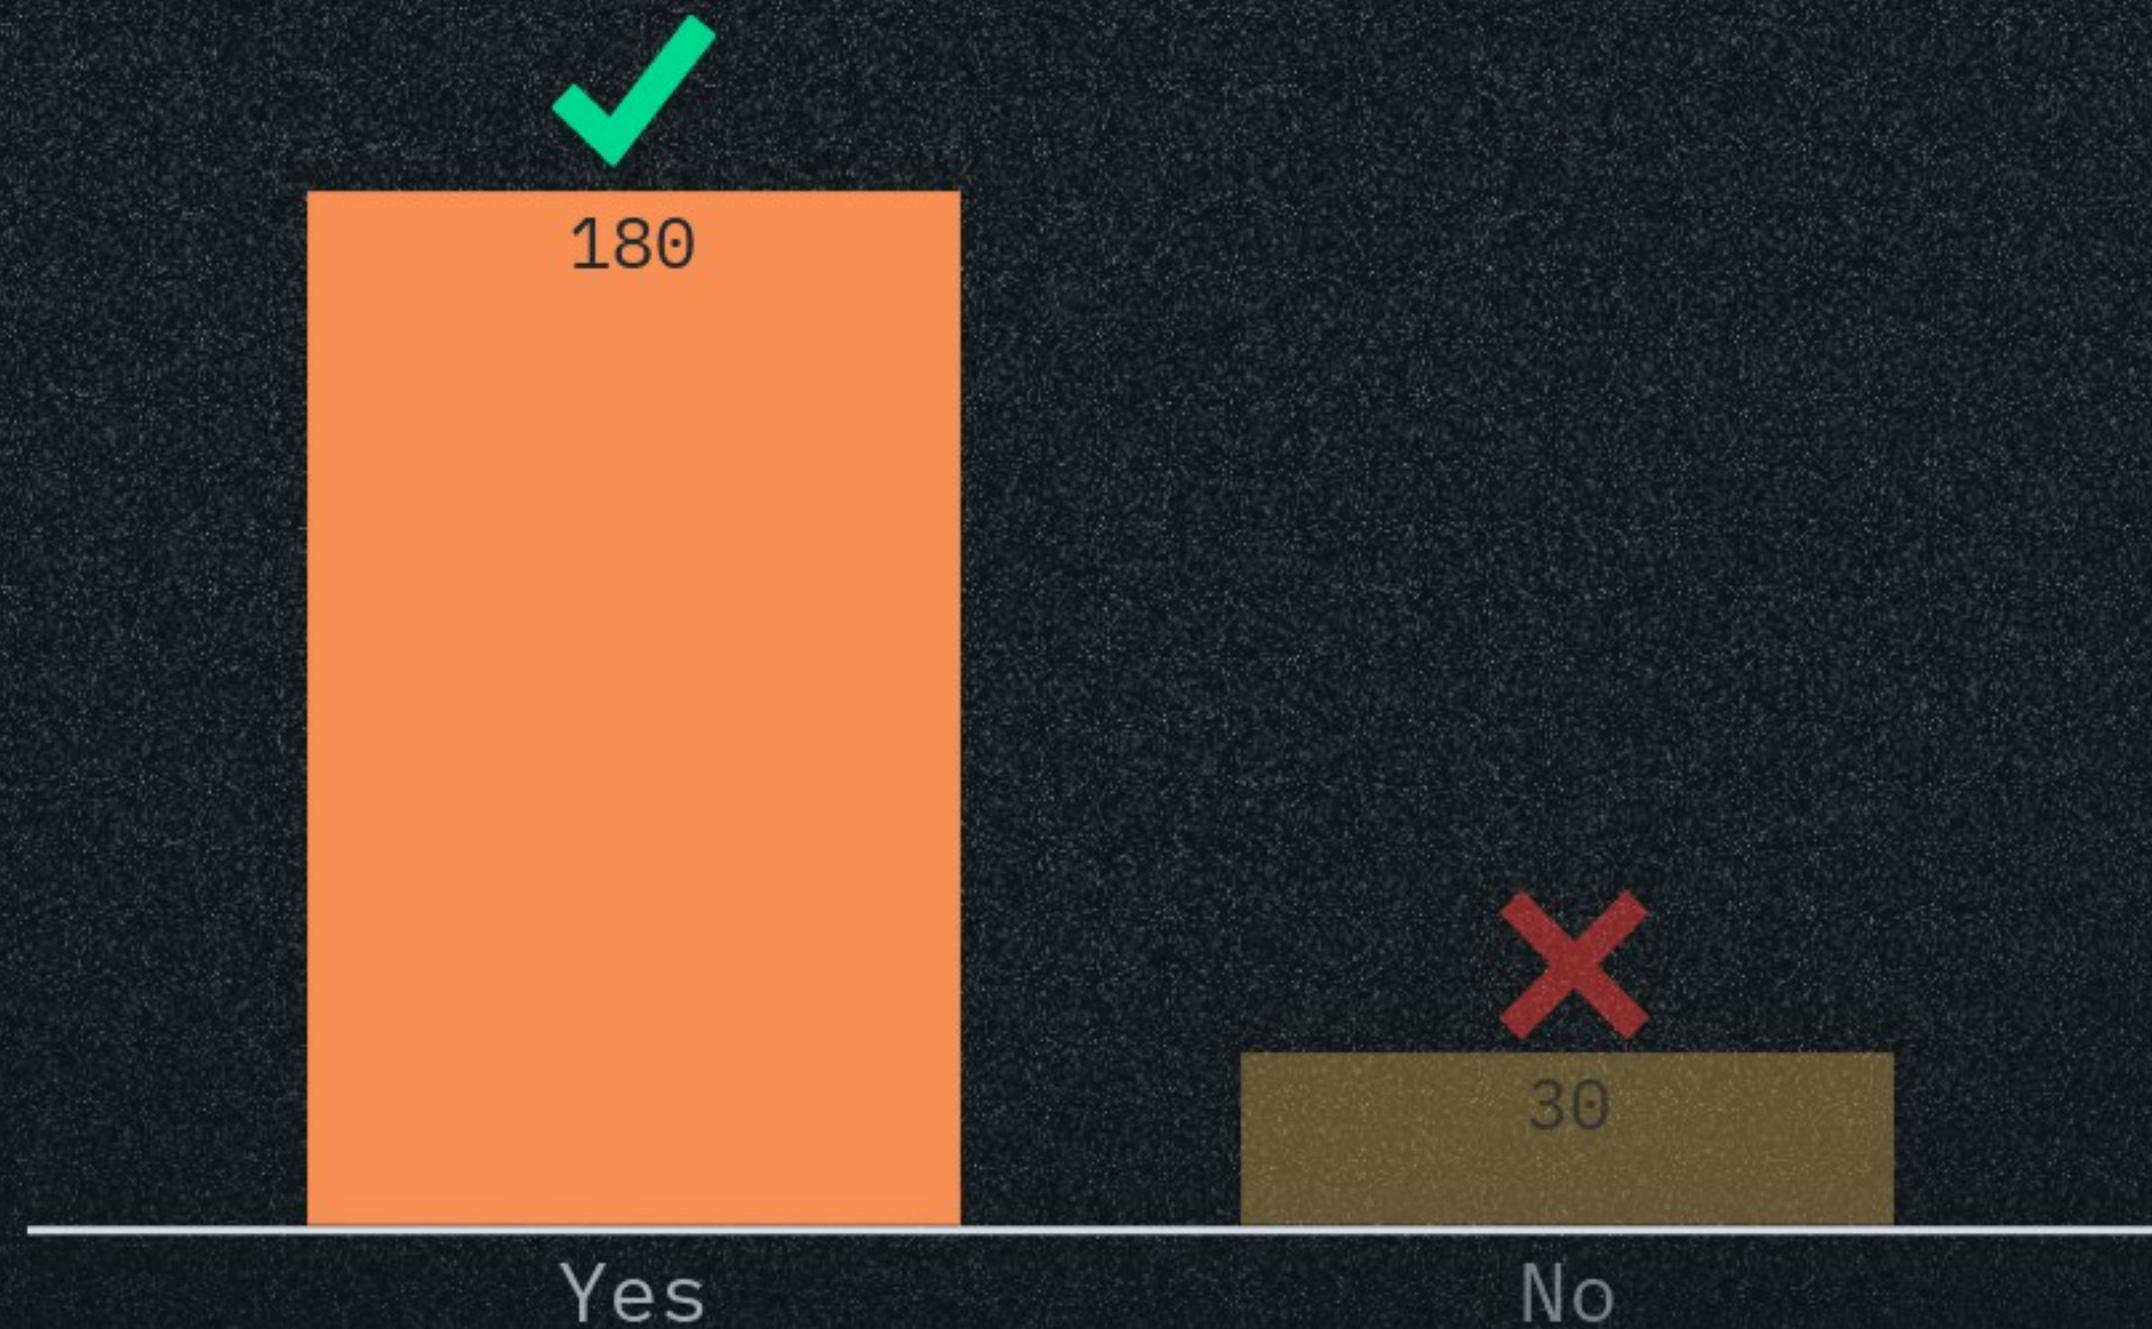

Or use QR code

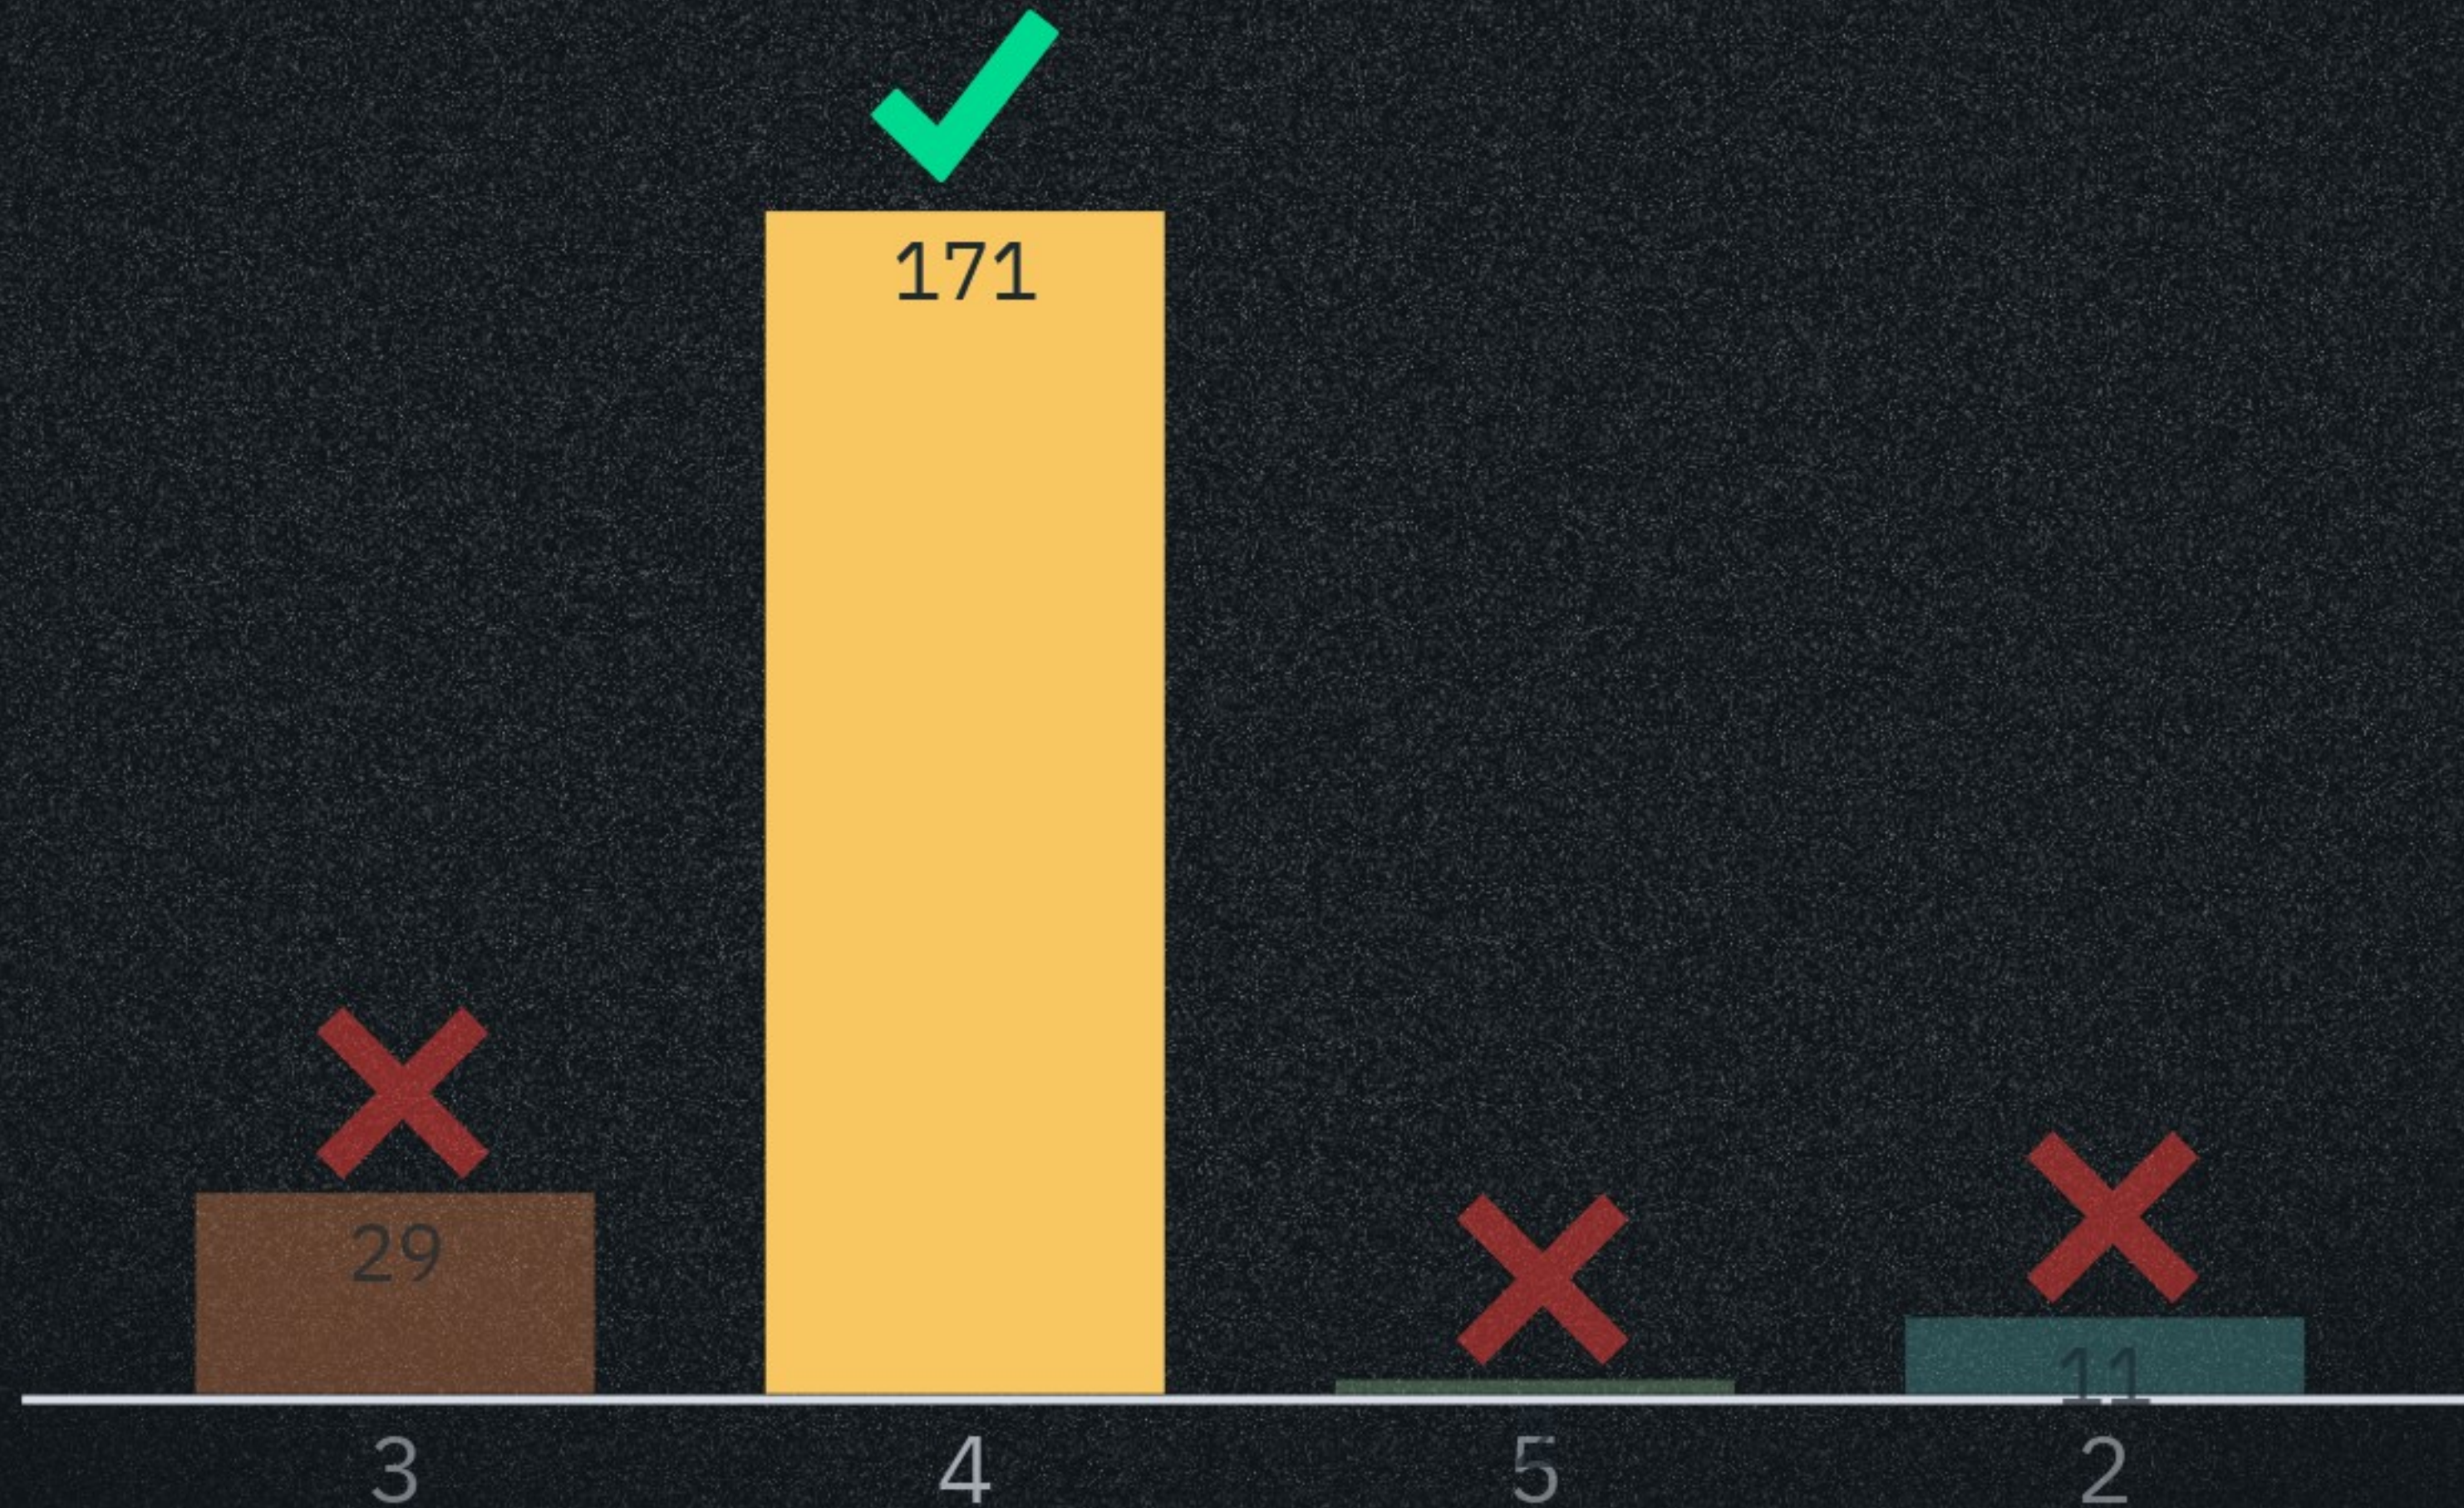

In the same array, I can have:

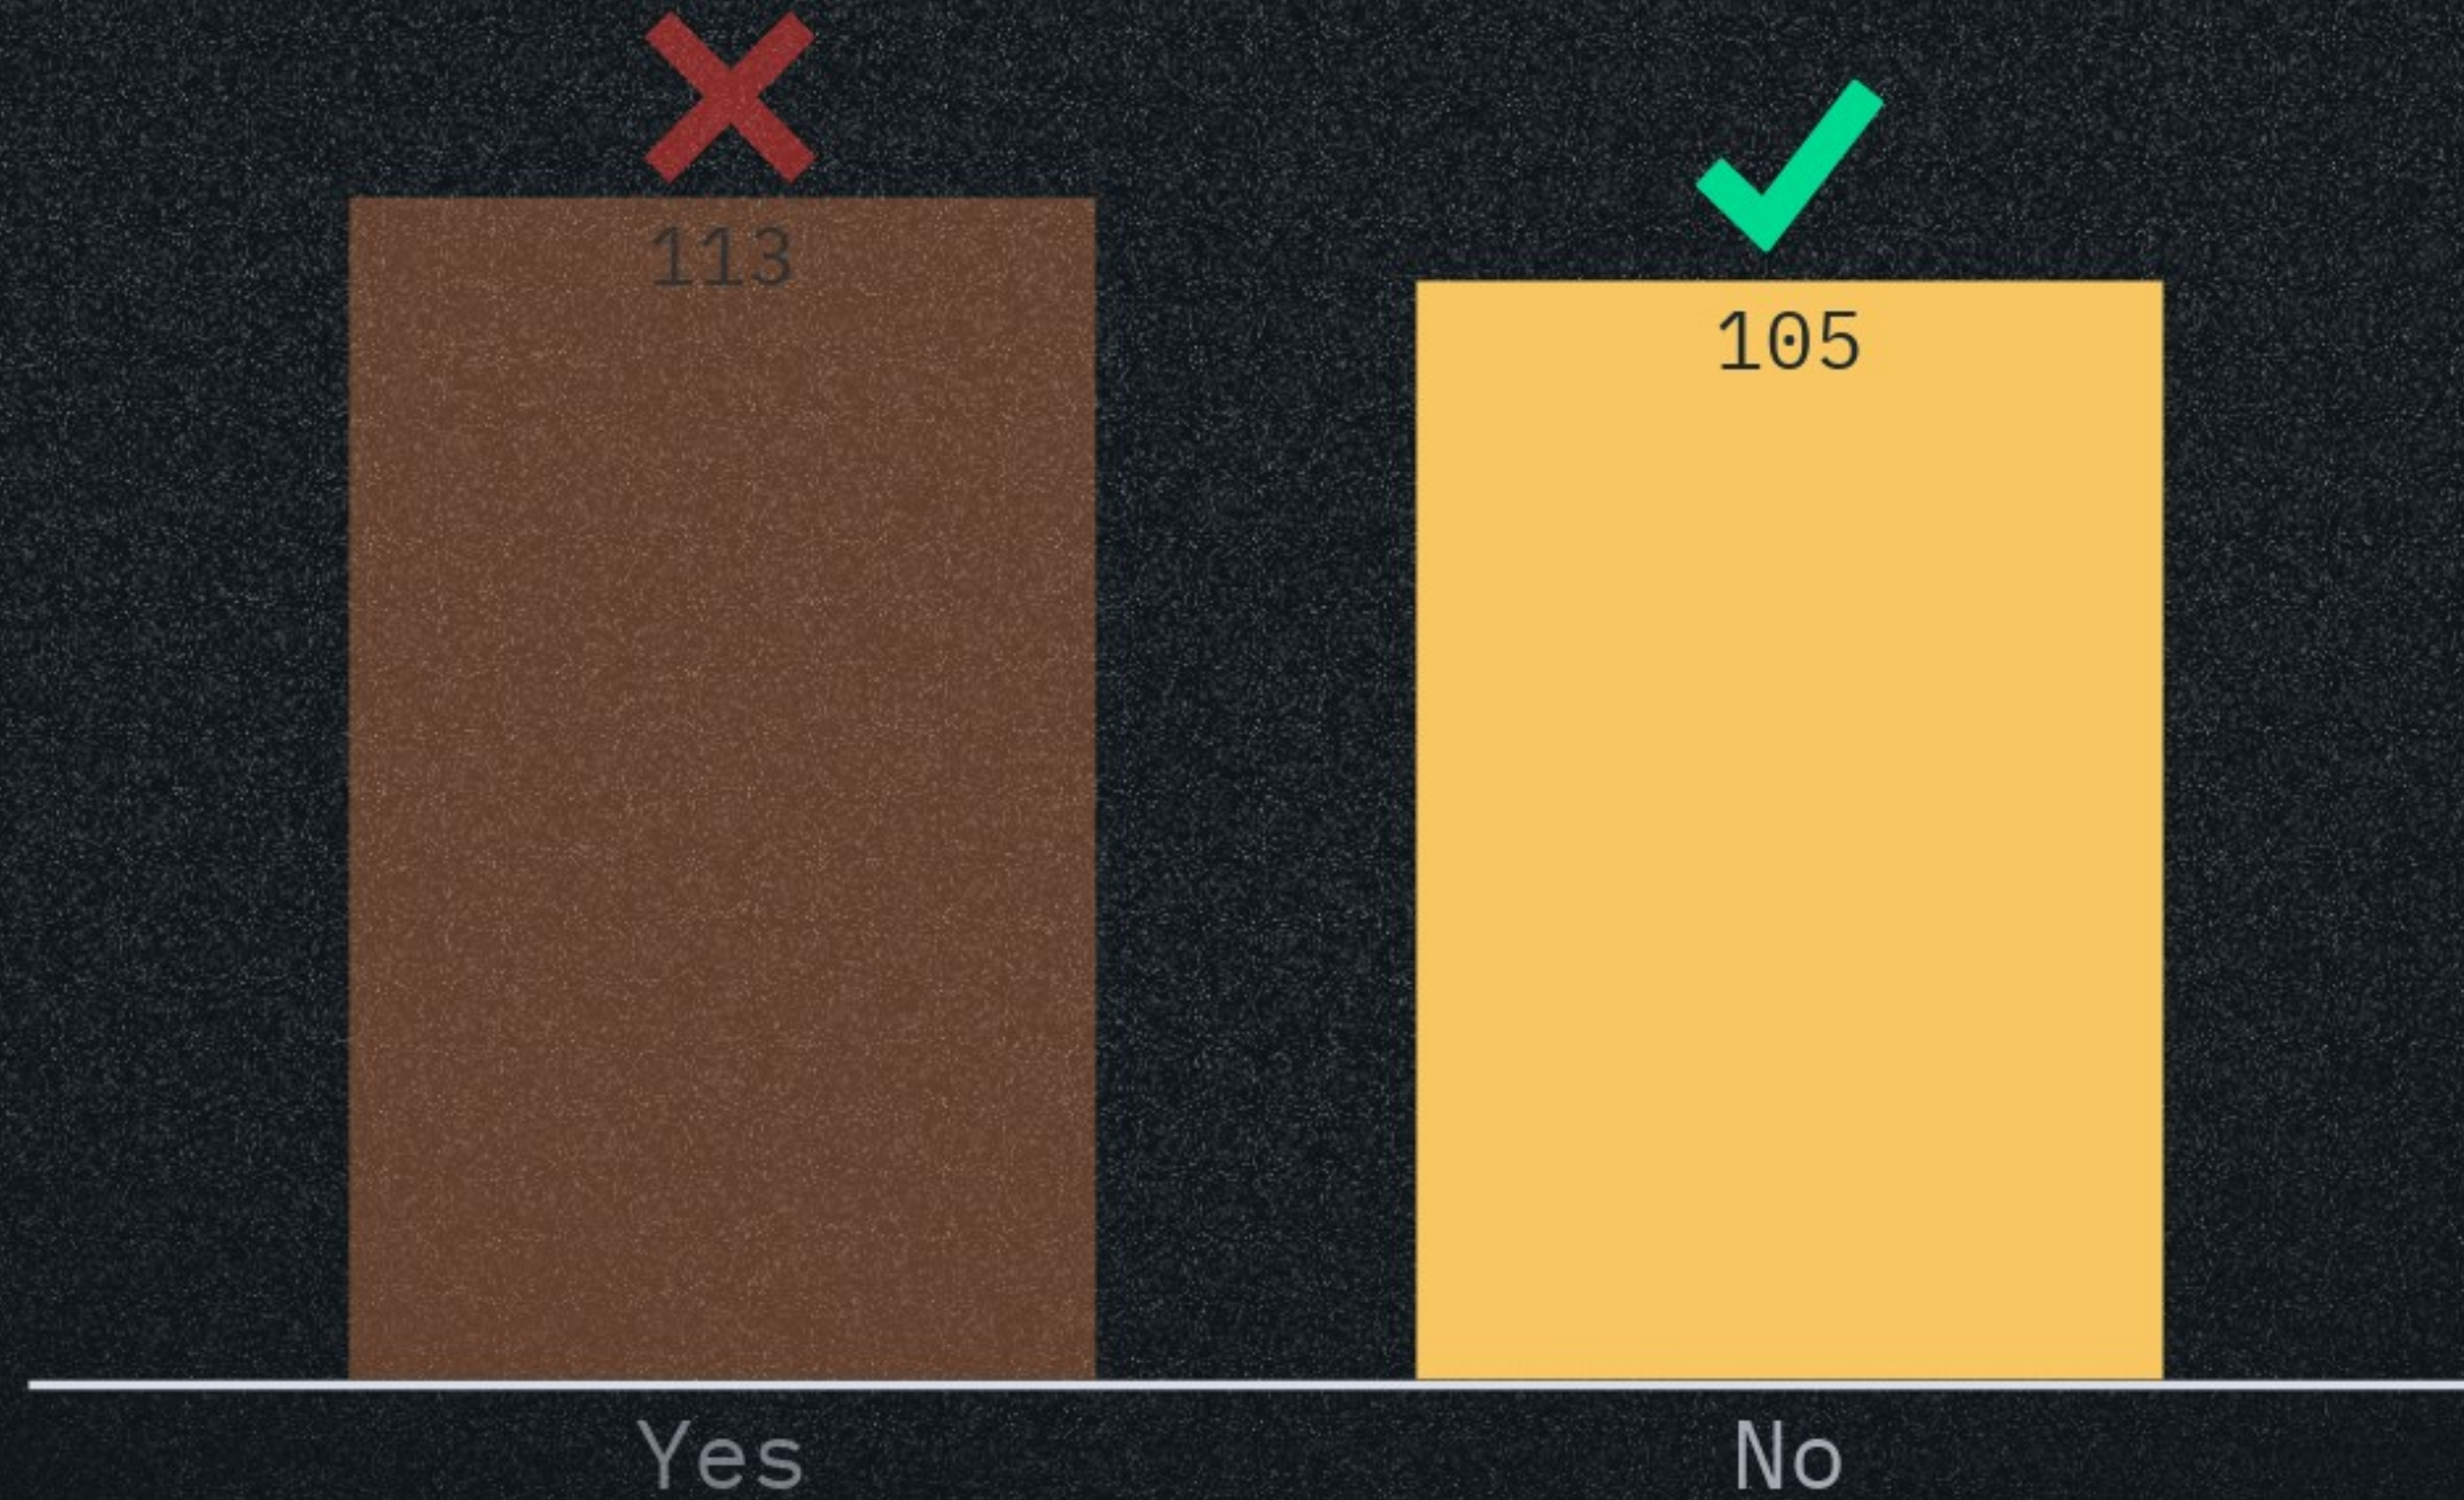

To declare an array (but not initialise), I must provide the size of the array

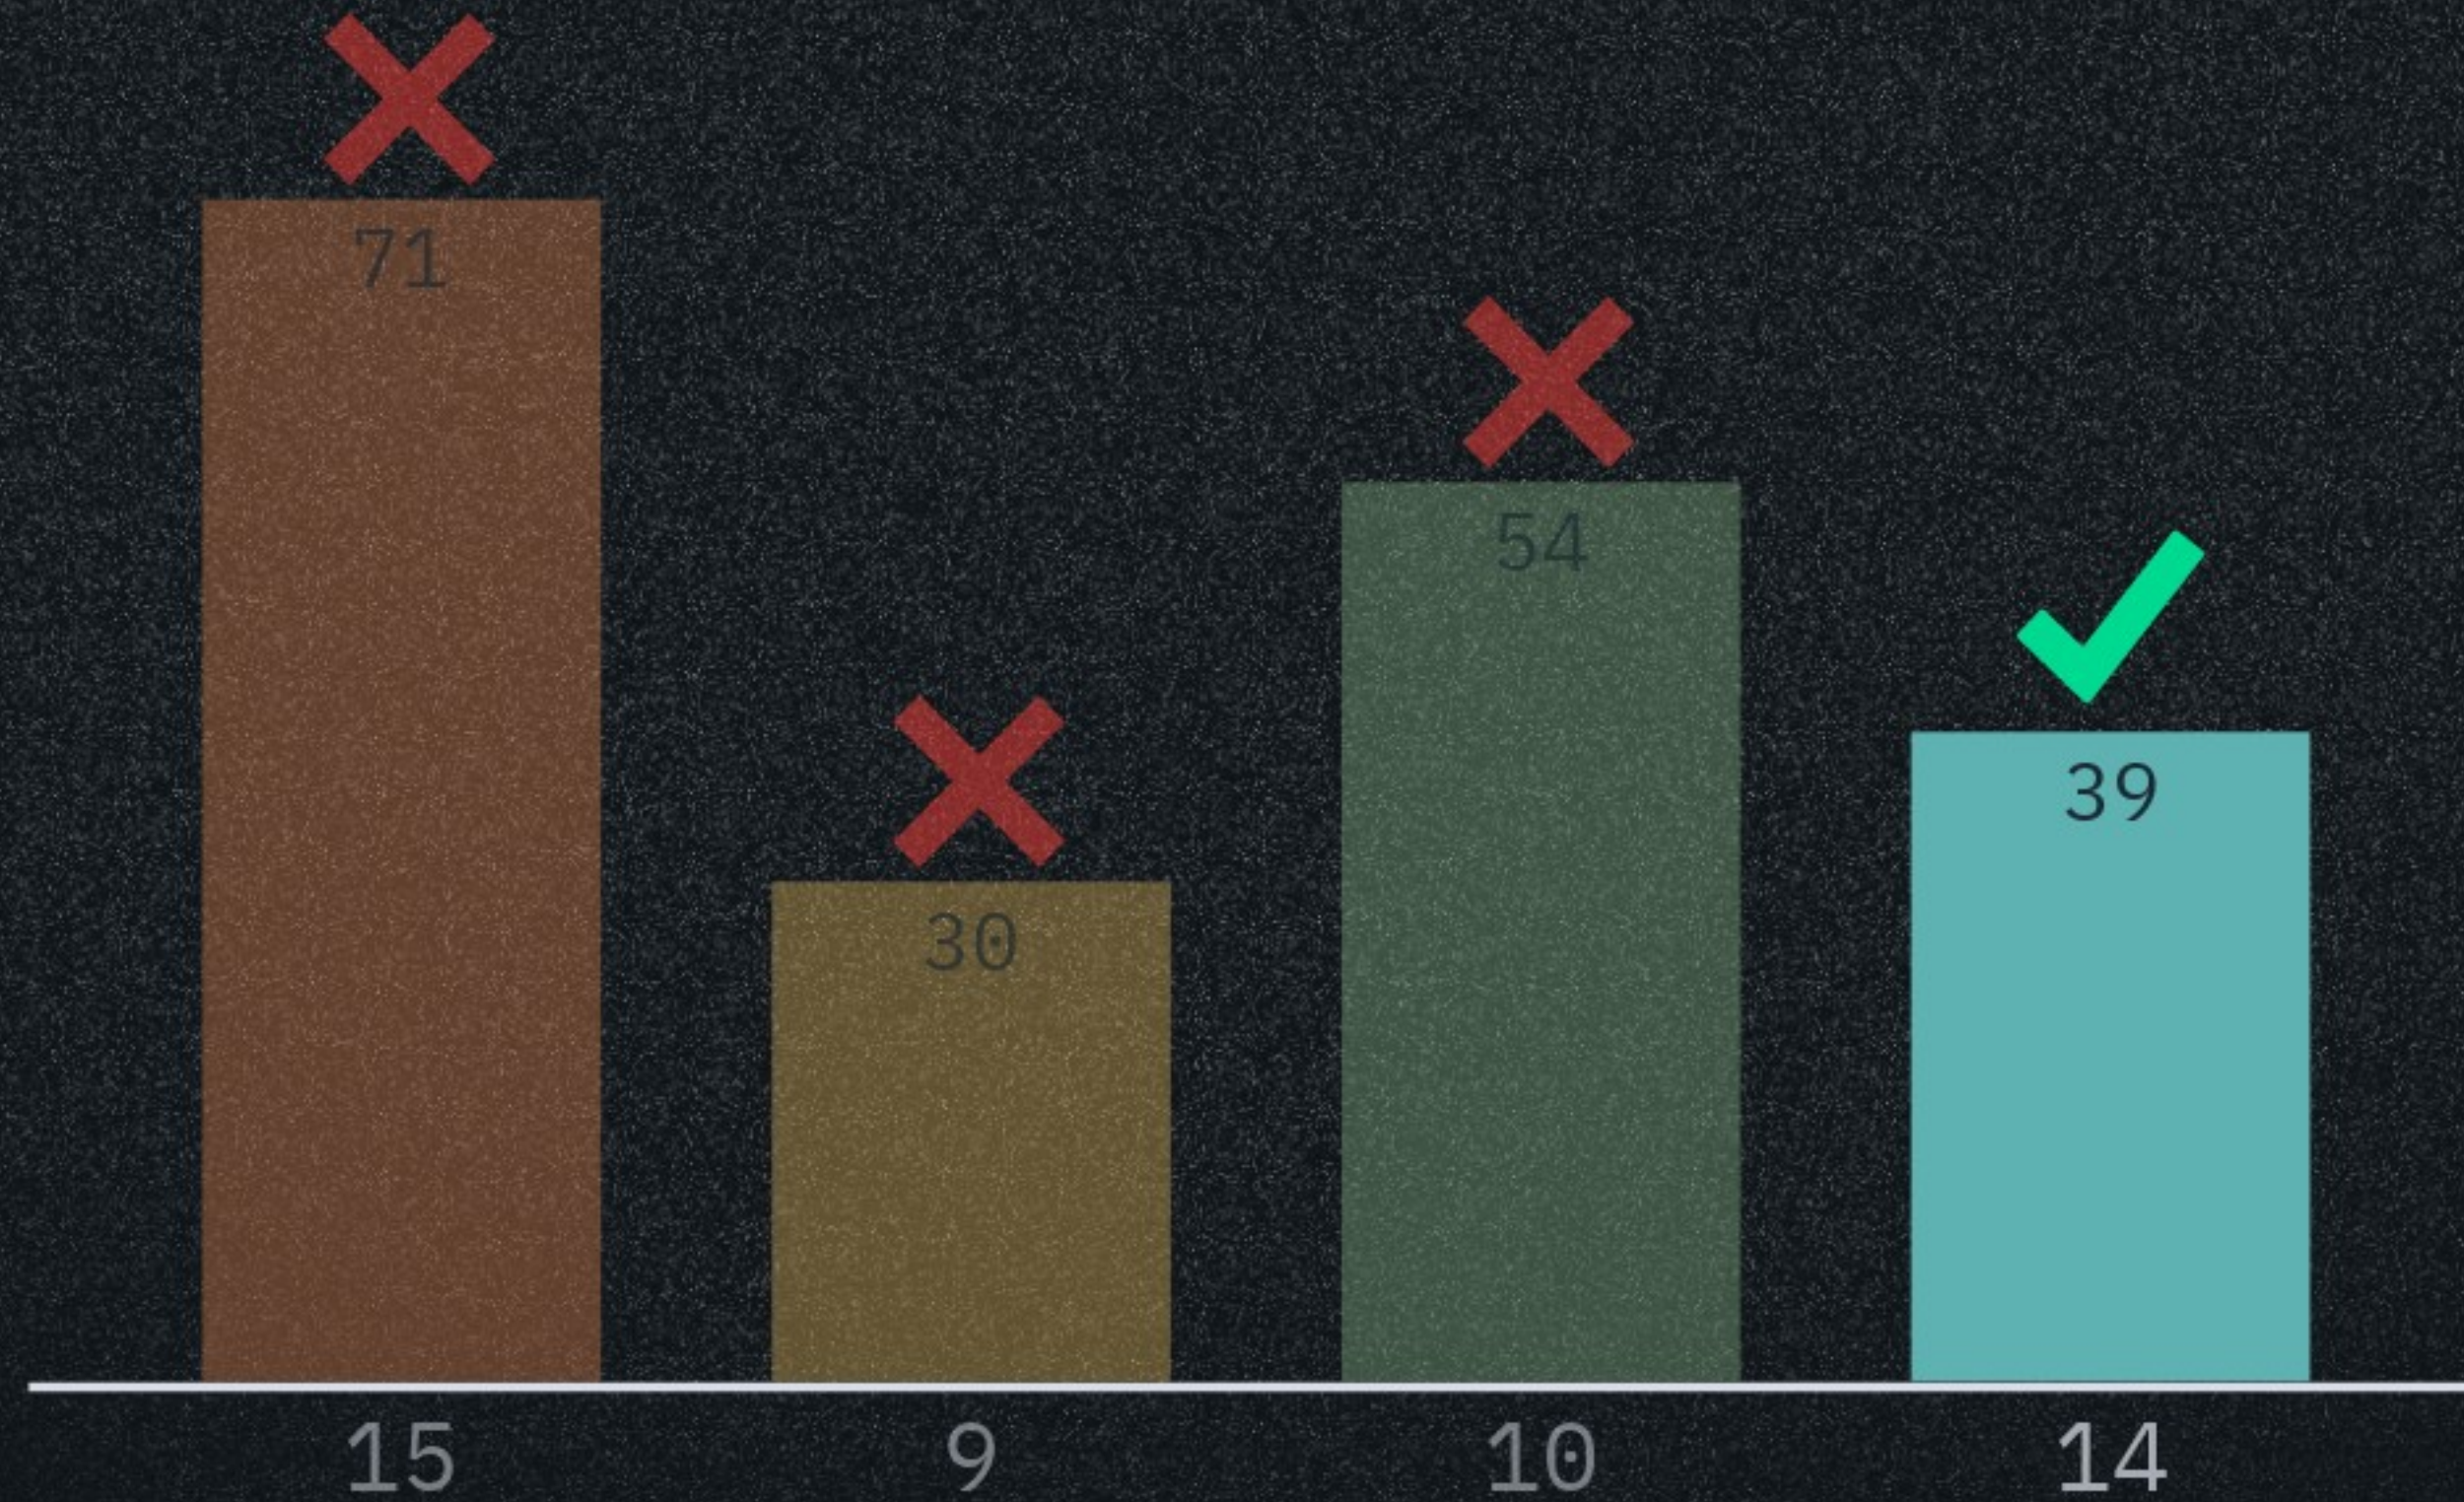

What would `array[3]` return?

This is a legal way to initialise an array:

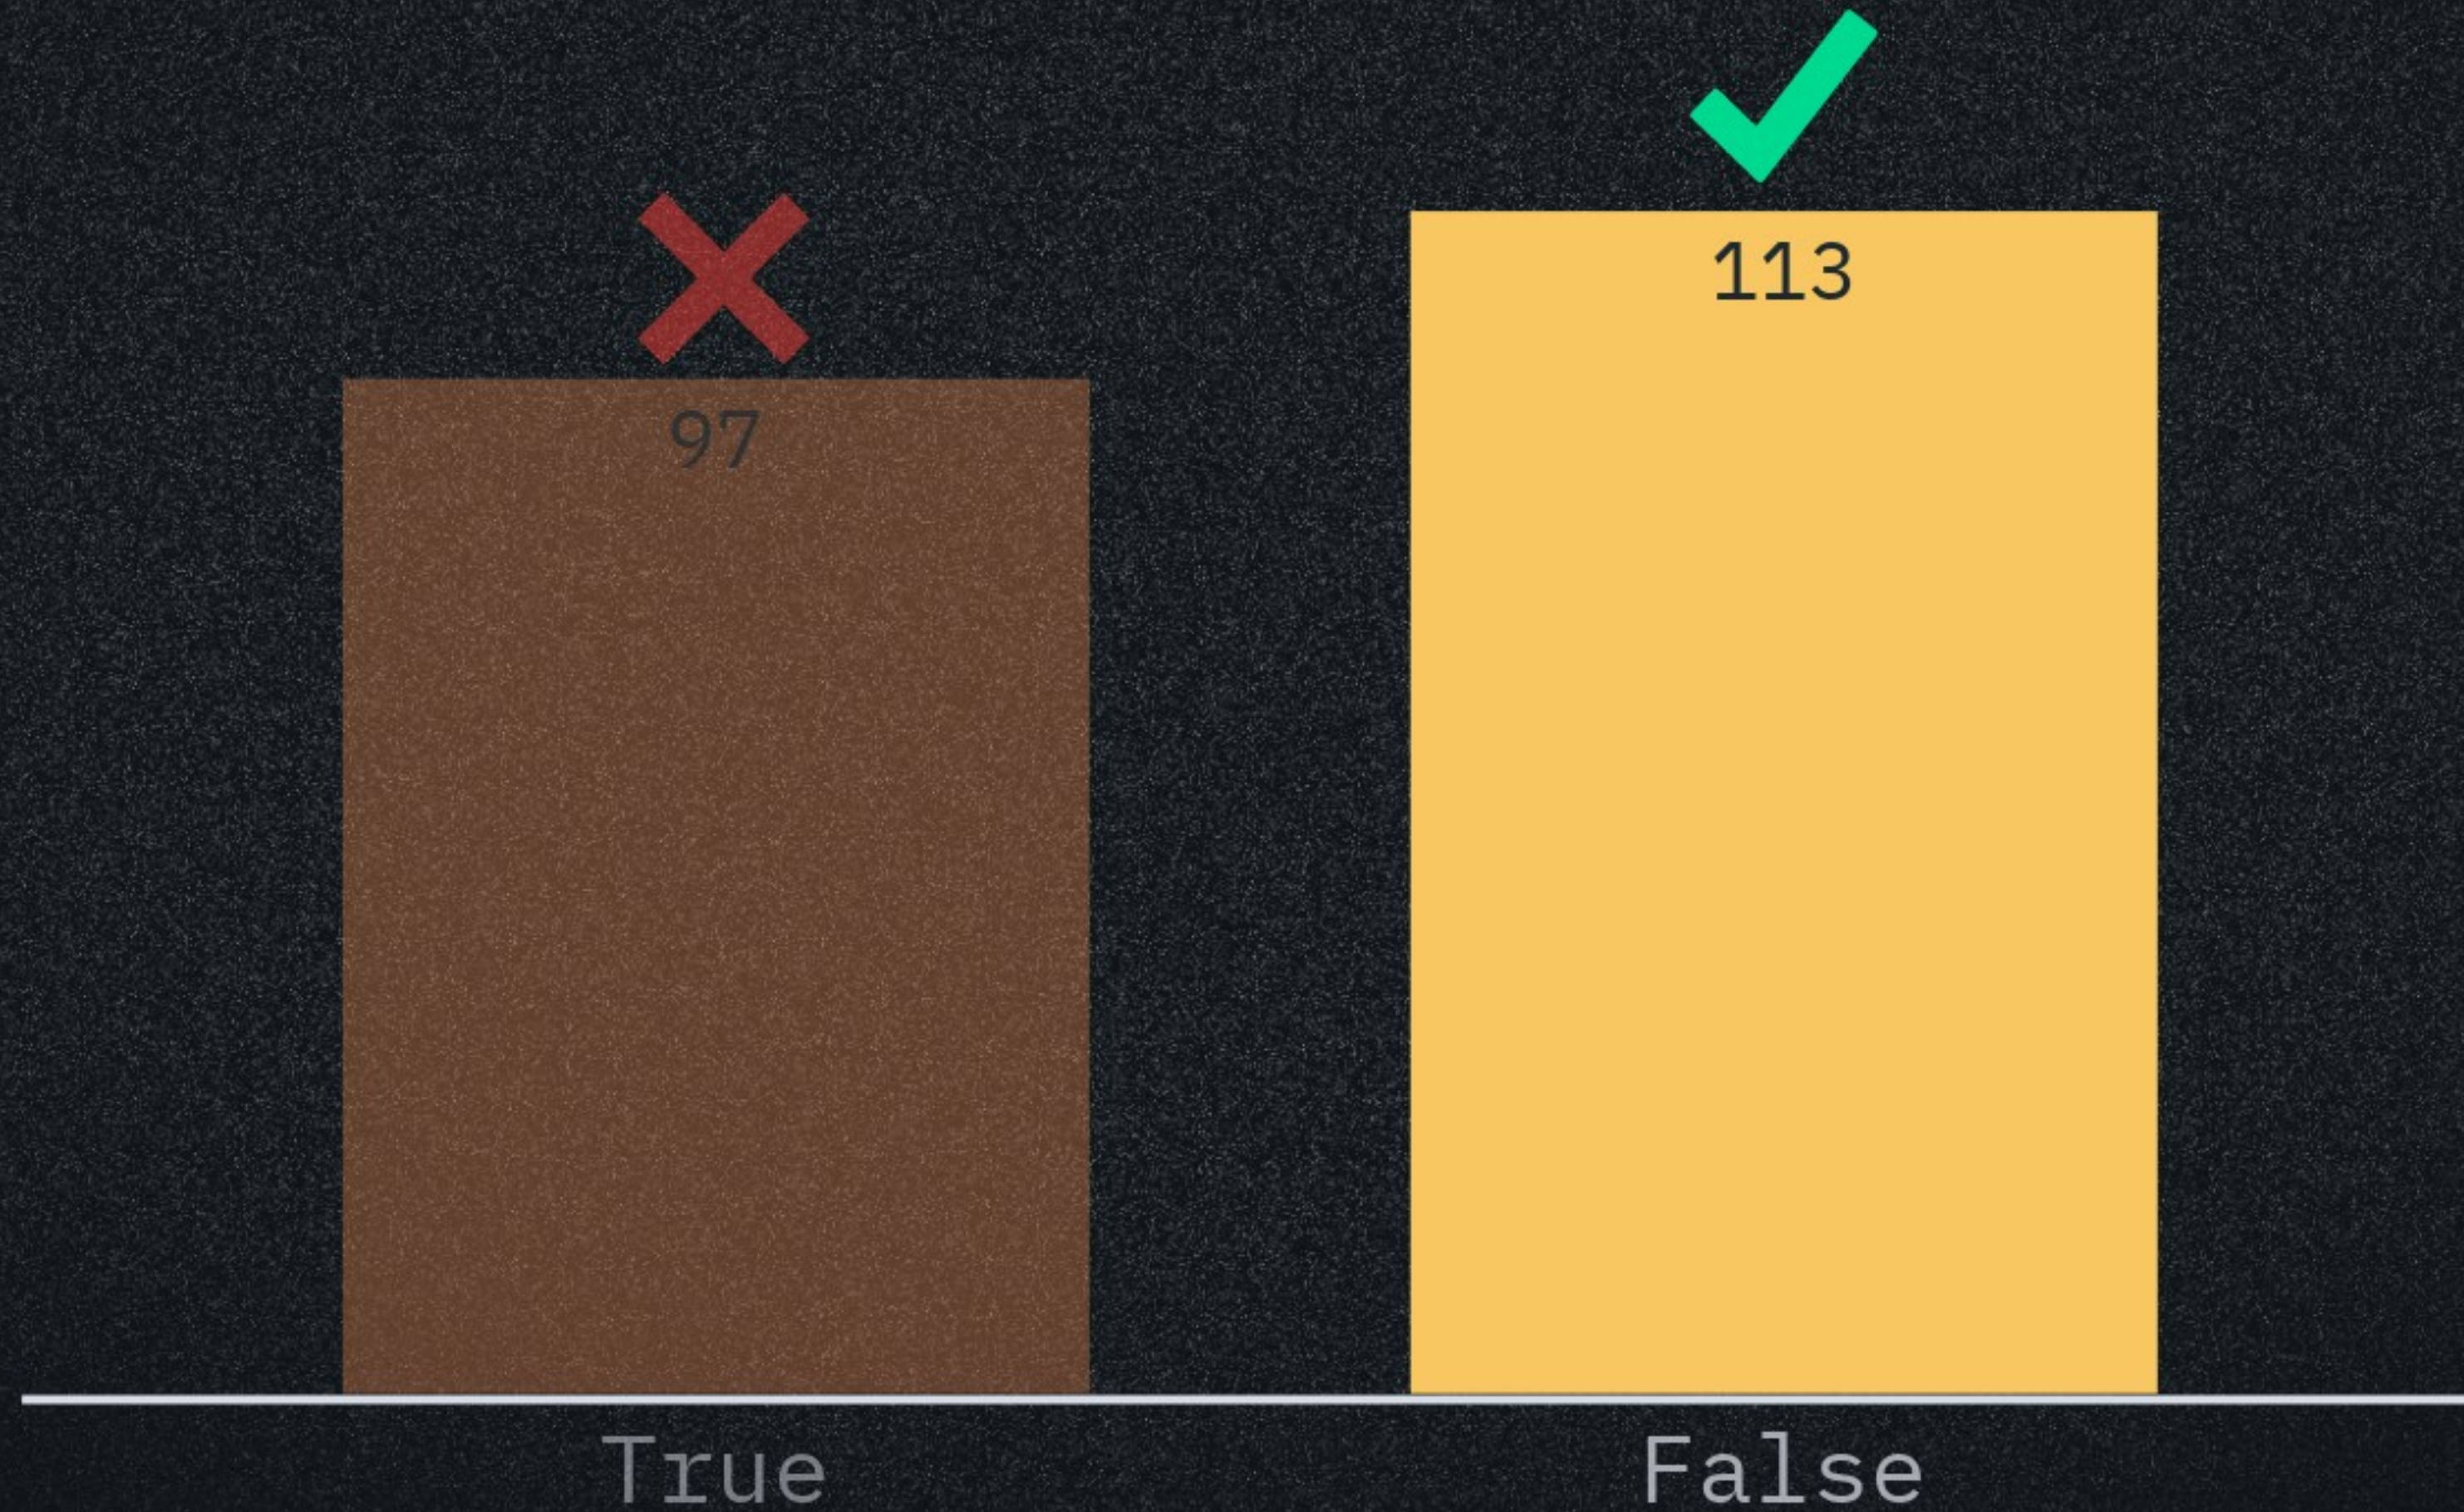

What does code snippet print out on line 8?

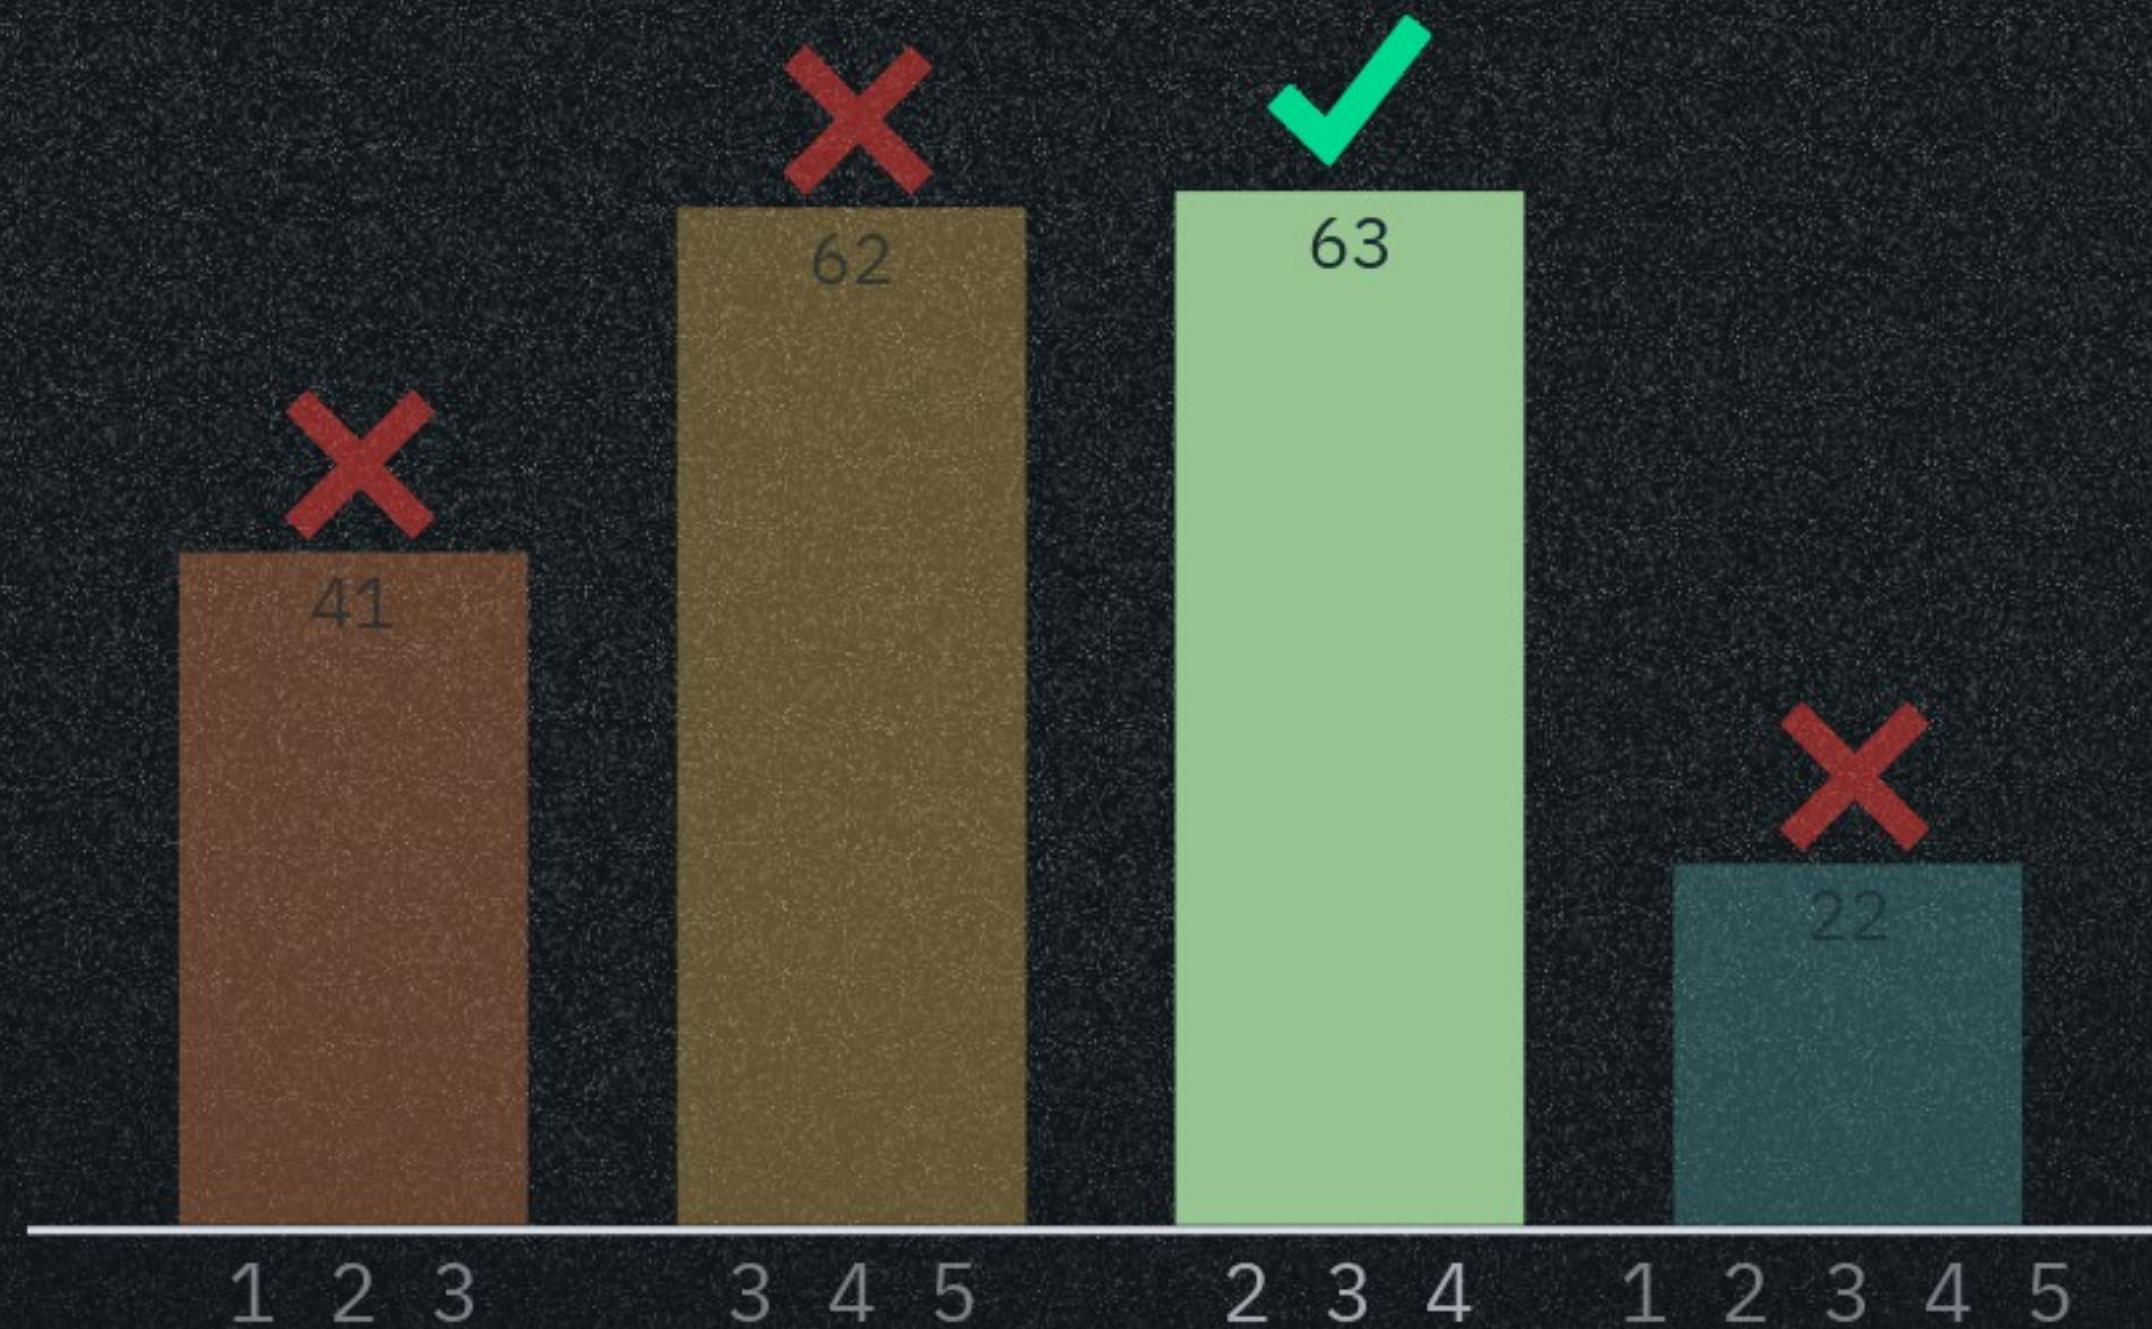

I can return an array in C...

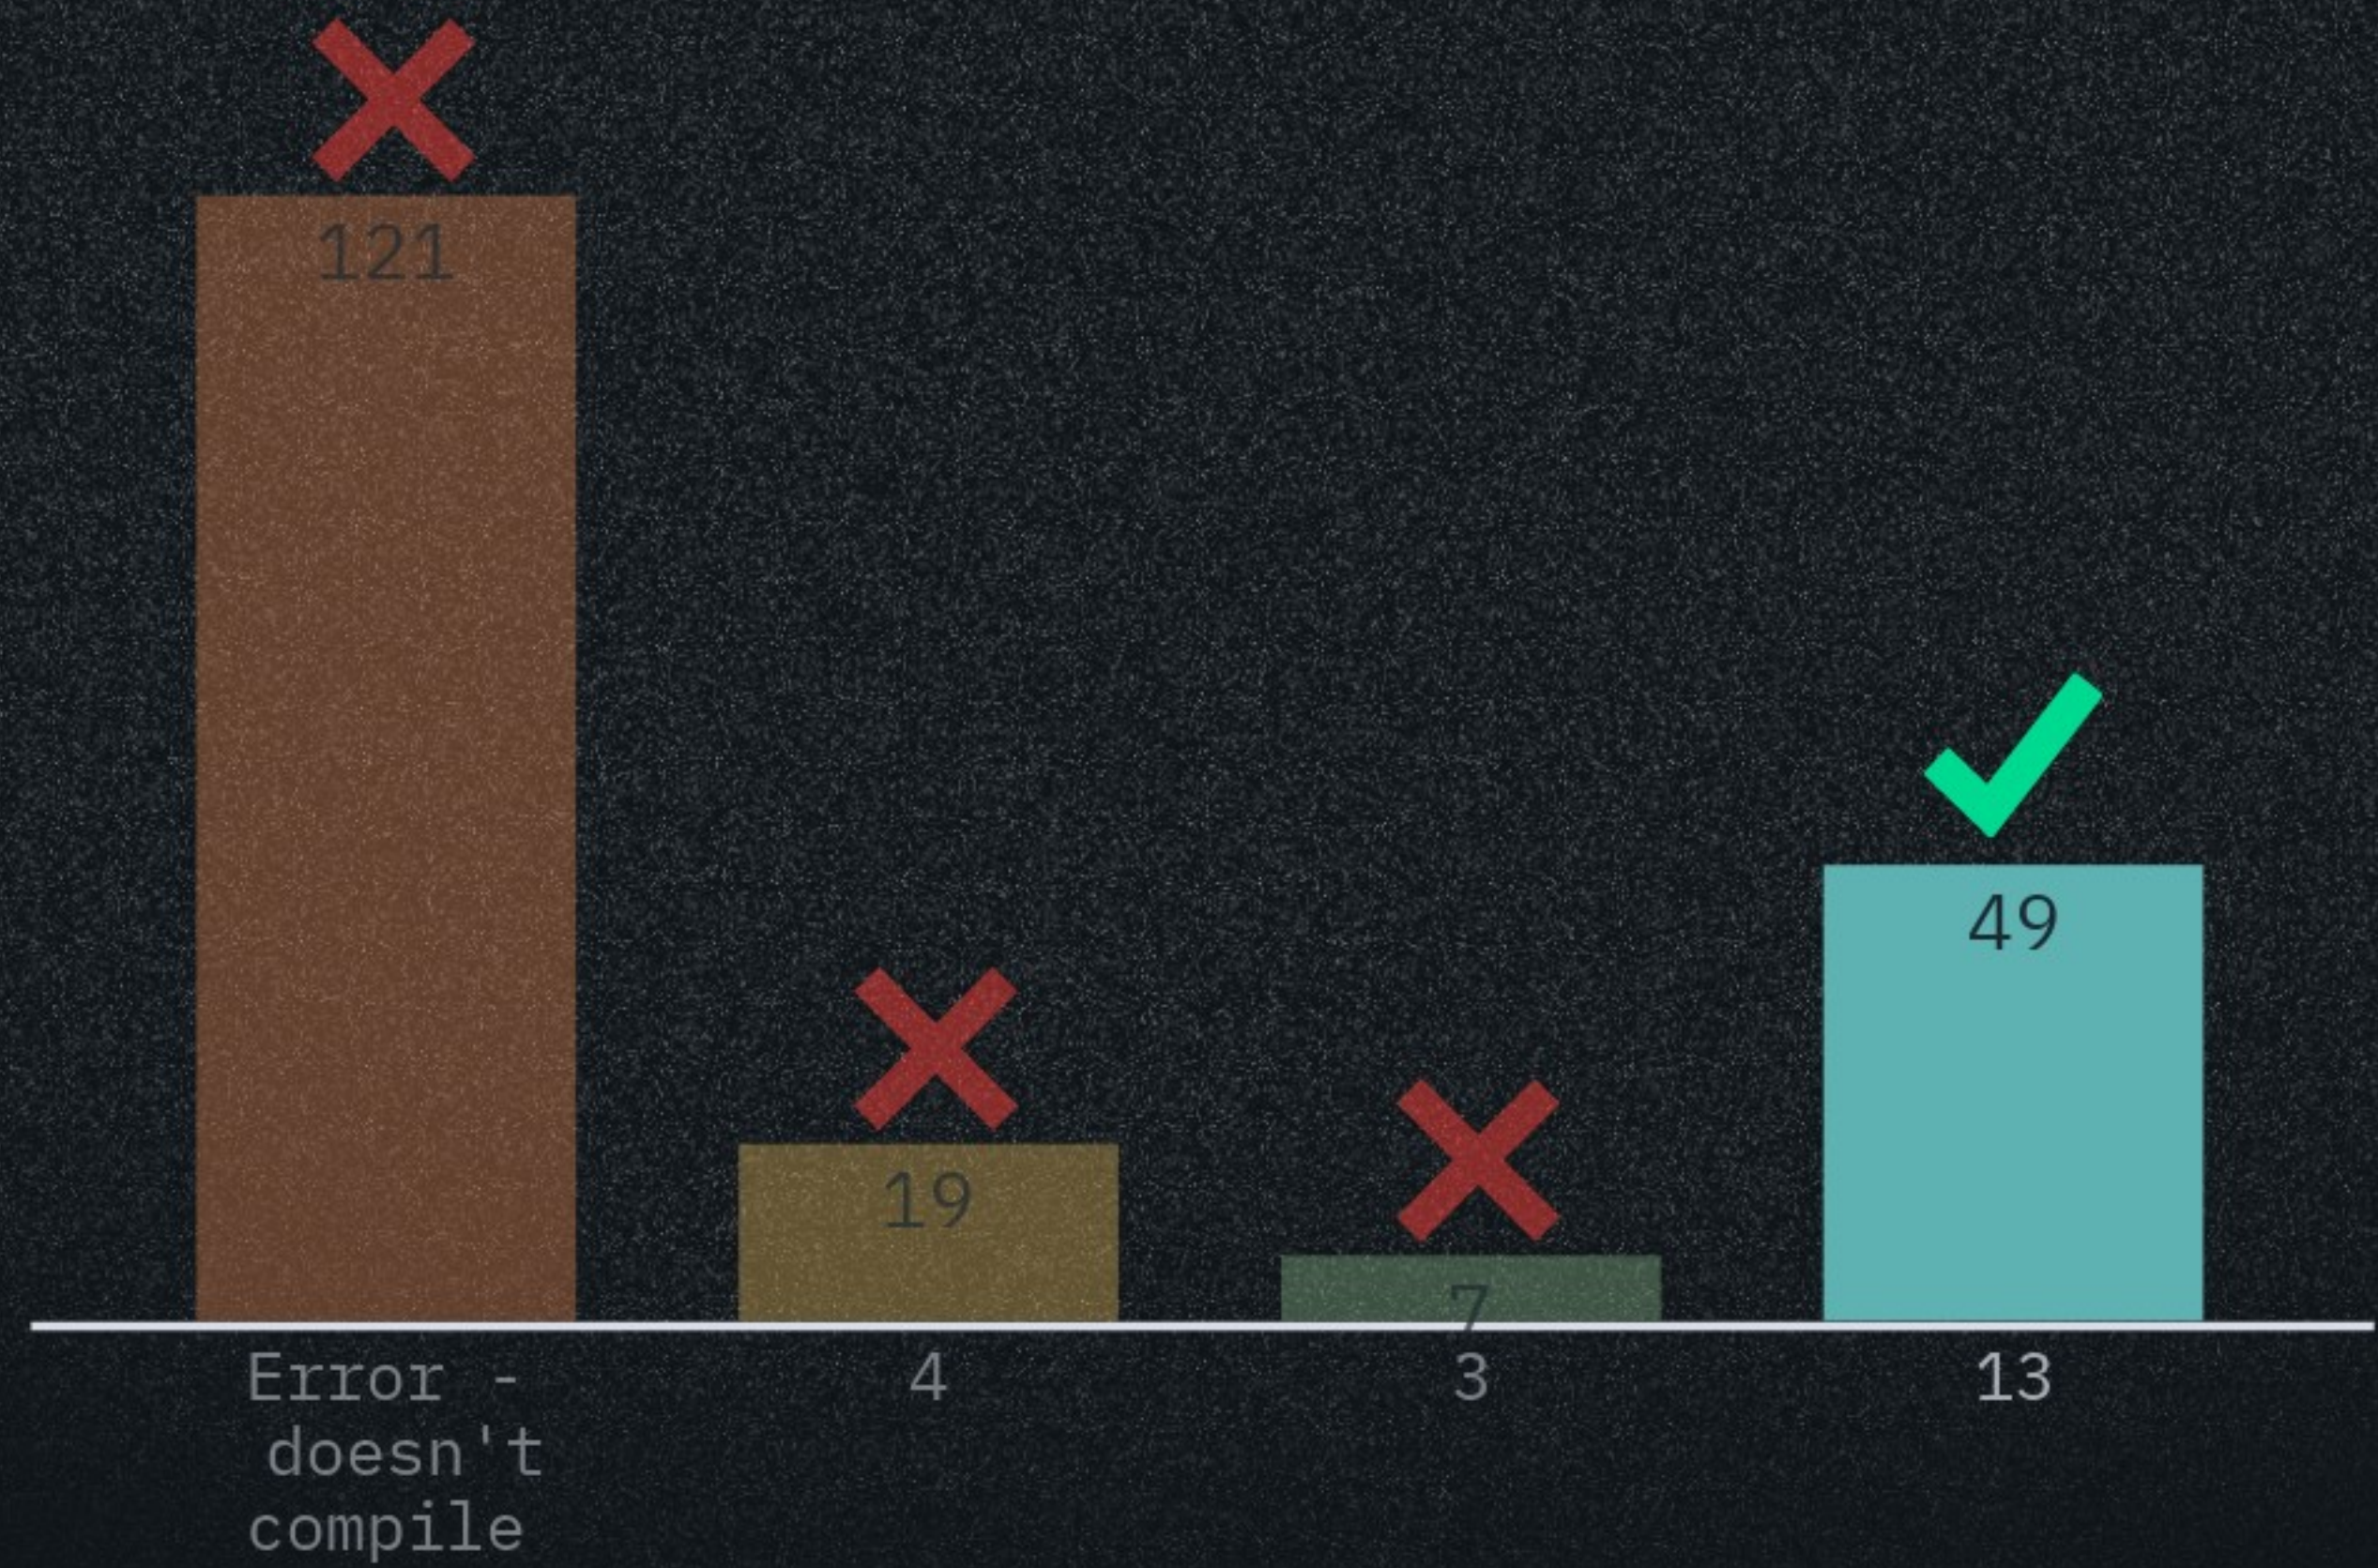

Mentimeter

After this code finishes running, what is printed out in terminal?

What is printed out to terminal on line 10?
