

2D Arrays

.....

.....

.....

.....

.....

.....

.....

Strings recap

- An array of chars
- We have a single identifier for the string
- Anything we can do with arrays, applies

.....

.....

.....

.....

.....

.....

.....

`char []`

index:	0	1	2	3	4	5	6	7	8	9	10	11	12	13
values:	J	A	K	E		R	E	N	Z	E	L	L	A	\0

Notice the `\0` at the end! This means that C will know when it reaches the end of the array

Note the # of elements, and don't forget the `\0`

.....

.....

.....

.....

.....

.....

.....

String literals

```
"Jake!"
```

- uses double quotes " to wrap the string literal
- single quote for characters!
- Used to assign strings to `char[]` easily:

```
char name[] = "Jake Renzella";
```

Useful string functions

- `fgets()` -> reads a string
- `fputs()` -> prints a string
- `strlen()` -> gives us the length of the string (excluding the `\0`).
- `strcpy()` -> copy the contents of one string to another
- `strcat()` -> join one string to the end of another (concatenate)
- `strcmp()` -> compare two strings
- `strchr()` -> find the first occurrence of a character

note: some of these may require `#include <string.h>`

.....

.....

.....

.....

.....

.....

.....

.....

Reassigning a string

```
int main(void) {  
    char name[MAX_LEN] =  
    "Jake";  
    strcpy(name, "Mr  
Otterington");  
}
```

^ Remember we can't reassign like:

```
name = "Mr  
Otterington";
```

.....

.....

.....

.....

.....

.....

.....

.....

2D arrays

.....

.....

.....

.....

.....

.....

.....

.....

We can have arrays of type
(char, int, struct, enum)

index:	0	1	2	3	4	5	6
values:							

.....

.....

.....

.....

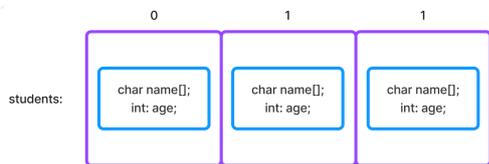

.....

.....

.....

.....

Array of structs

– Use

`students[1].name;` to
access element 1's name

.....

.....

.....

.....

.....

.....

.....

.....

Array of arrays 2D arrays

```
<type> <identifier>  
[<rows>] [<cols>];
```

.....

.....

.....

.....

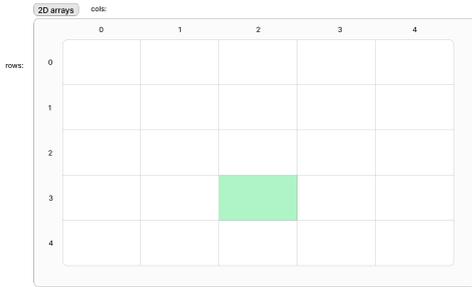

.....

.....

.....

.....

```
int my_grid[5][5];  
my_grid[2][3];
```

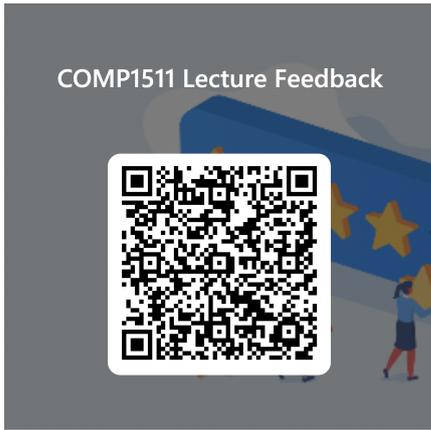

Visualisation

Large demo Program

- An array of array of structs
- Battleships? Naughts and Crosses?
