Course Topics

- regular expressions
- unix filters
- shell
- git
- python
- make
- linux: tools, concepts

Course Assessment

- 15% Labs
- 10% Weekly Tests
- 15% Assignment 1 — due week 7
- 15% Assignment 2 — due week 11
- 45% Final Exam

Above marks may be scaled to ensure an appropriate distribution

To pass you must:

- score at least 50/100 overall
- score at least 18/45 (40%) on final exam

For example:

55/100 overall, but only 17/45 on final exam ⇒ 55 UF not 55 PS
Labs and Tests

- Labs, in weeks 1-5, 7-10:
  - Max lab mark each week
    - 1.6 marks without challenge exercises
    - 0.4 marks for challenge exercises
    - Or 2 marks if there are no challenge exercises
  - Labs marks summed and capped to give mark /15.
  - You can get 95% for lab mark without challenge exercises
  - Expectation: Most people will get 12+/15

- Tests, in weeks 3...10:
  - Max test mark each week:
    - 1.7 marks
  - Best 6 of 8 test marks summed and capped to give mark /10.
  - Expectation: Most people will get 7+/10

The 24T1 Final Exam

- Final exam in CSE labs Monday 06/05
  - Closed book exam — no materials allowed.
  - But you will have access to offline language cheatsheets, documentation & man/info pages
  - Same as weekly tests (and the practice exam)

Two sessions: morning & afternoon

- You have been asked to indicate preference (preference form closes Friday)
- We will be allocated you to preferred session if possible
- You will receive an e-mail with a link to your allocation by end Week 11

- Afternoon session starts before morning session finishes
  - Not permitted to leave morning session early
  - Not permitted to start afternoon session late
  - Afternoon session allocation will indicate a tutorial/lecture room (not a CSE lab)
  - Afternoon session people accompanied to lab after morning session finishes

Exam Conditions

- UNSW on-campus exam rules apply
  - See https://www.student.unsw.edu.au/exam/rules

- Including:
  - Must bring your student card (other photo-id if student card lost)
  - Phone, smart watch, other electronic devices switched off in your bag
  - You may bring a clear water bottle
  - You may bring a clear pencil case with pens, pencils, eraser, ruler, ...
    - No calculator
    - Must bring at least one pen or pencil to fill in a declaration form
  - You cannot bring your own keyboard/mouse or other hardware

- Deliberate violation of exam conditions will be treated as serious misconduct.
Exam Environment

- Restricted exam environment - not your CSE account
  - similar to default CSE lab environment
  - If you attended the practice exam, you've seen the exam environment
- No access to internet
- No access to your files
  - no editor configuration files!
  - Syntax highlighting has been added for you
- Gedit, Vim, Emacs, Nano, VSCode, ED, etc. provided as editors: pick your favourite
- Standard CSE lab machine commands available

Exam Format

- 8-15 questions ... not of equal difficulty, not necessarily worth equal marks.
  - generally, easier questions are towards the start of the exam, harder questions towards the end.
  - but difficulty is subjective, so you might find that some questions are easier then earlier questions.
- Each question answered in a separate file.
- Most questions will involve writing programs ...
- Some questions will ask you to write a Shell script.
  - or perhaps a single pipeline
  - or perhaps a single regular expression
- Some questions will ask you to write a Python script.
  - Python questions will likely specify you can not run external commands
    - e.g. can not use subprocess
  - Python questions may specify you not use certain packages
    - e.g. can not import requests
- If a question specifies any additional restrictions or limitations, you must follow them.
  - otherwise you will not receive any marks for the question.
- Other languages are not permitted (e.g., Perl, C, Java, Rust, ...)
- Answers will be submitted with give.
- Autotesting your code is not a submission.
- It’s possible that some questions may not involve coding ...
  - questions could ask for a short answer,

Exam Format — Programming Questions

For questions that require you to write Shell or Python ...

- Questions will include examples.
- You may, or may not, be given starting code, test data, or other files.
  - If you are not given starting code, you must create your own files.
    - The name of the file will be specified in the question.
- Autotests may be available for some questions.
  - Passing autotests does not guarantee any marks; do your own testing.
  - There may be no autotests for some questions.
- If autotests are available they will run on submission
  - This will be disabled in the last ~10 minutes of the exam.
    - So that submissions are faster to process.
- It is not sufficient to match any supplied examples.
- Questions may specify additional restrictions or limitations imposed on your program.
  - You must follow these restrictions or limitations otherwise you will not receive any marks.
  - Questions with additional restrictions will be hand-marked to ensure you have followed them.
- Autotesting your code is not a submission.
  - You must submit your code with give.
Programming Questions — Assessment and Marking

- Answers will be run through automatic marking software.
  - Please follow the input/output format shown exactly.
  - Please make your program behave exactly as specified.
- Answers that don’t pass all automatic marking tests are hand-marked, guided by automarking.
  - *no* marks awarded for style or comments …
    - but a human marker will be reading your program
    - and you need to read your program
    - so use reasonable style, variable names, ...
  - comments only necessary to tell the marker something.
  - do not include your name in comments
- Minor errors will result in only a small penalty.
  - e.g., an answer correct except for a missing semi-colon
    would receive almost full marks.
- No marks will given unless an answer has a substantial part of a solution (> 33%).
- No marks just for starting a question and writing some generic code.
- Zero marks for submitting starter code even if it passes some autotests.

Exam Format — Non-coding Questions

- Each question will specify a file to write your answer in.
- Answers must be in the specified file, e.g. `q1.txt`
- Question may specify format of file:
  - e.g., 5 integers, one per line …
  - follow this format exactly
- Questions will give you an initial file to complete.

Past Final Exam

- A past Final Exam will be released by noon Monday at:
  [link to practice exam]
- Encouraged to complete it as a practice exam
  - under exam conditions & with time limit
- Autotests available
- don’t need to give (no marks involved!)
- Sample answers will be released noon Saturday Week 11
- this term’s exam will use similar format similar for at least some questions
Special Exam Conditions

- Any extra time specified in your ELS exam conditions is allowed in this exam.
- All students see the same exam question text.
- The text shows the standard exam deadline, any extra time is additional to it.
  - if in doubt ask exam supervisor
- email cs2041@cse.unsw.edu.au if you have concerns regarding ELS conditions
- If your ELS conditions prevent you from taking the exam, let us know.

Exam clashes

- you should have been contacted if you have a clash.
- UNSW policy is that you may be required to take two exams in one day.
- Exams Unit generally don’t consider all-day exams a clash and special consideration is not generally offered.

Special Consideration (“Fit-to-Sit”)

This exam is covered by UNSW’s Fit-to-Sit policy.

By starting the exam, you are saying

“I am well enough to finish the exam.”

- If you are unwell before the exam:
  - Do not attend the exam
  - Apply for Special Consideration.
  - See a Doctor and get a medical certificate ASAP.
- If you become unwell during the exam:
  - talk to an exam supervisor ASAP
What to study

- Important Areas to Focus Your Study On
  - anything covered in a standard lab exercise
  - anything covered in a weekly test
  - anything covered by assignments (except hardest subsets)

- Less Important Areas
  - challenge lab exercise
  - topics not covered in labs, tests or assignments
  - anything covered by hardest subset of assignment
  - may still be questions on these topics but not many

Timeline: Provisional Results

- Marking will take time — likely 10-12 days.
- When marking is complete, exam marks will be available on the course webpage “marks” page. We’ll send an email (Ed Announcement) announcing this.
- You will receive marks for individual exam questions.
- You will have an opportunity to have your marking reviewed.
  - marks are reviewed if there is an issue with the marking not because you disagree with the mark you received.
- Final results will appear on myUNSW.

Supplementary Assessment

- If you miss the original exam due to illness/misadventure, you may be eligible for a supplementary exam; apply for special consideration.
  - Schools and individual courses cannot offer supps.
- Students with borderline results are not offered supps. (... except potential graduands.)
- Similar format to final exam.
- Supp exams will be in T2 week 0 in CSE labs
COMP2041/9044 - The Bad

- So many important things to learn: regex, filters, Shell, git, Python ...
  - not nearly enough time to cover everything well
- labs a lot of work
  - but a good way to understand the topics (agree?)
  - and you practised some really useful skills (agree?)
- assignments a lot of work
  - but really improved your Shell/Python (agree?)
  - and also gave you deep understanding of git (agree?)
- Python coverage needs to be better organized and cater better to varying Python experience of students
- missing labs on linux
  - need lab exercises where you manipulate a linux system

COMP2041/9044 - The Good

- Labs & tutes (do you agree?)
- Weekly Tests (do you agree?)
- Tutors
- Students

And that's all ...

- Good Luck
- I hope what you've learnt in this course will be useful.
- I hope you get the mark you deserve.
- Good Luck on your exams (for this course and others).
  - We will see most (all?) of you during the exam.
