

A Dataset for Sentiment and Sarcasm Classification for Varieties of English

Dr. Aditya Joshi (he/him) and Dipankar Srirag (he/him)
School of Computer Science Engineering,
UNSW Sydney

In collaboration with:

Funded by:

UNSW AI Symposium 2024
Organized by UNSW AI Institute

Current Benchmarks

In this case, benchmarks are datasets and evaluation results for language-related tasks.

Current Benchmarks

Model	URL	Score	CoLA	SST-2
Turing ULR v6		91.3	73.3	97.5
Vega v1		91.3	73.8	97.9
Turing NLR v5		91.2	72.6	97.6
DeBERTa + CLEVER		91.1	74.7	97.6
ERNIE		91.1	75.5	97.8
StructBERT + CLEVER		91.0	75.3	97.7
DeBERTa / TuringNLRv4		90.8	71.5	97.5

In this case, benchmarks are datasets and evaluation results for language-related tasks.

What about World Englishes?

What about World Englishes?

We have created a benchmark for sentiment and sarcasm classification for three varieties of English.

How we created the dataset for this benchmark

How we created the dataset for this benchmark

● —————→

Language Varieties

- Australian (en-AU)
- British (en-UK)
- Indian (en-IN)

How we created the dataset for this benchmark

●

Language Varieties

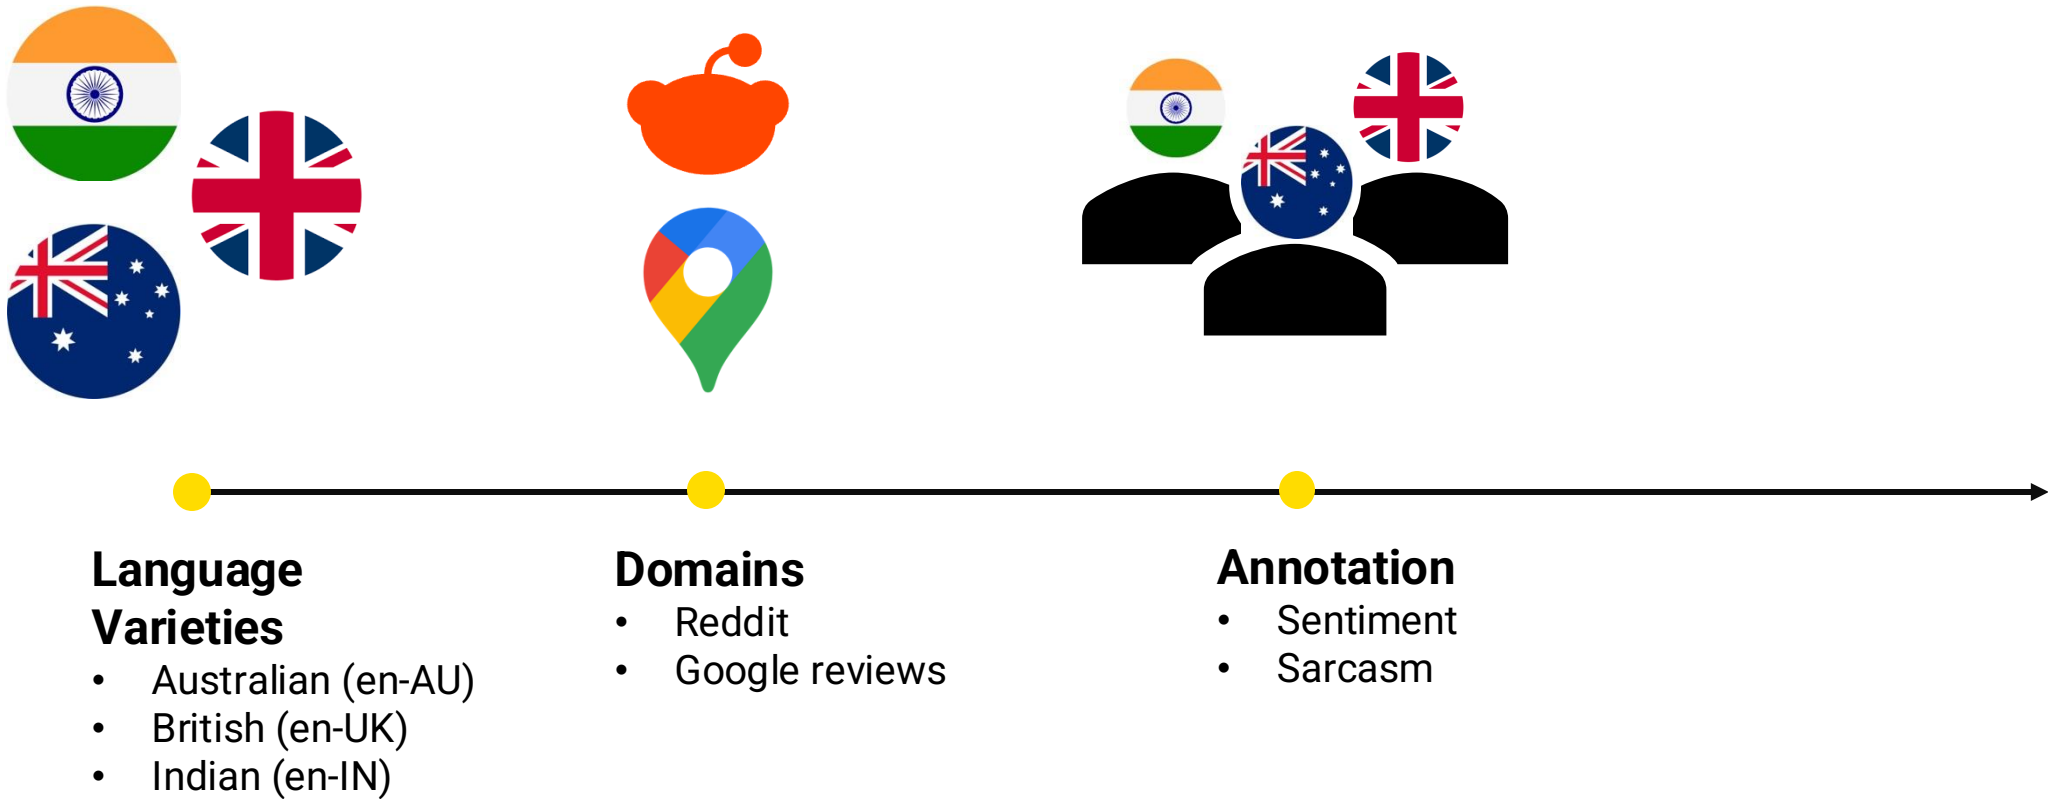

- Australian (en-AU)
- British (en-UK)
- Indian (en-IN)

●

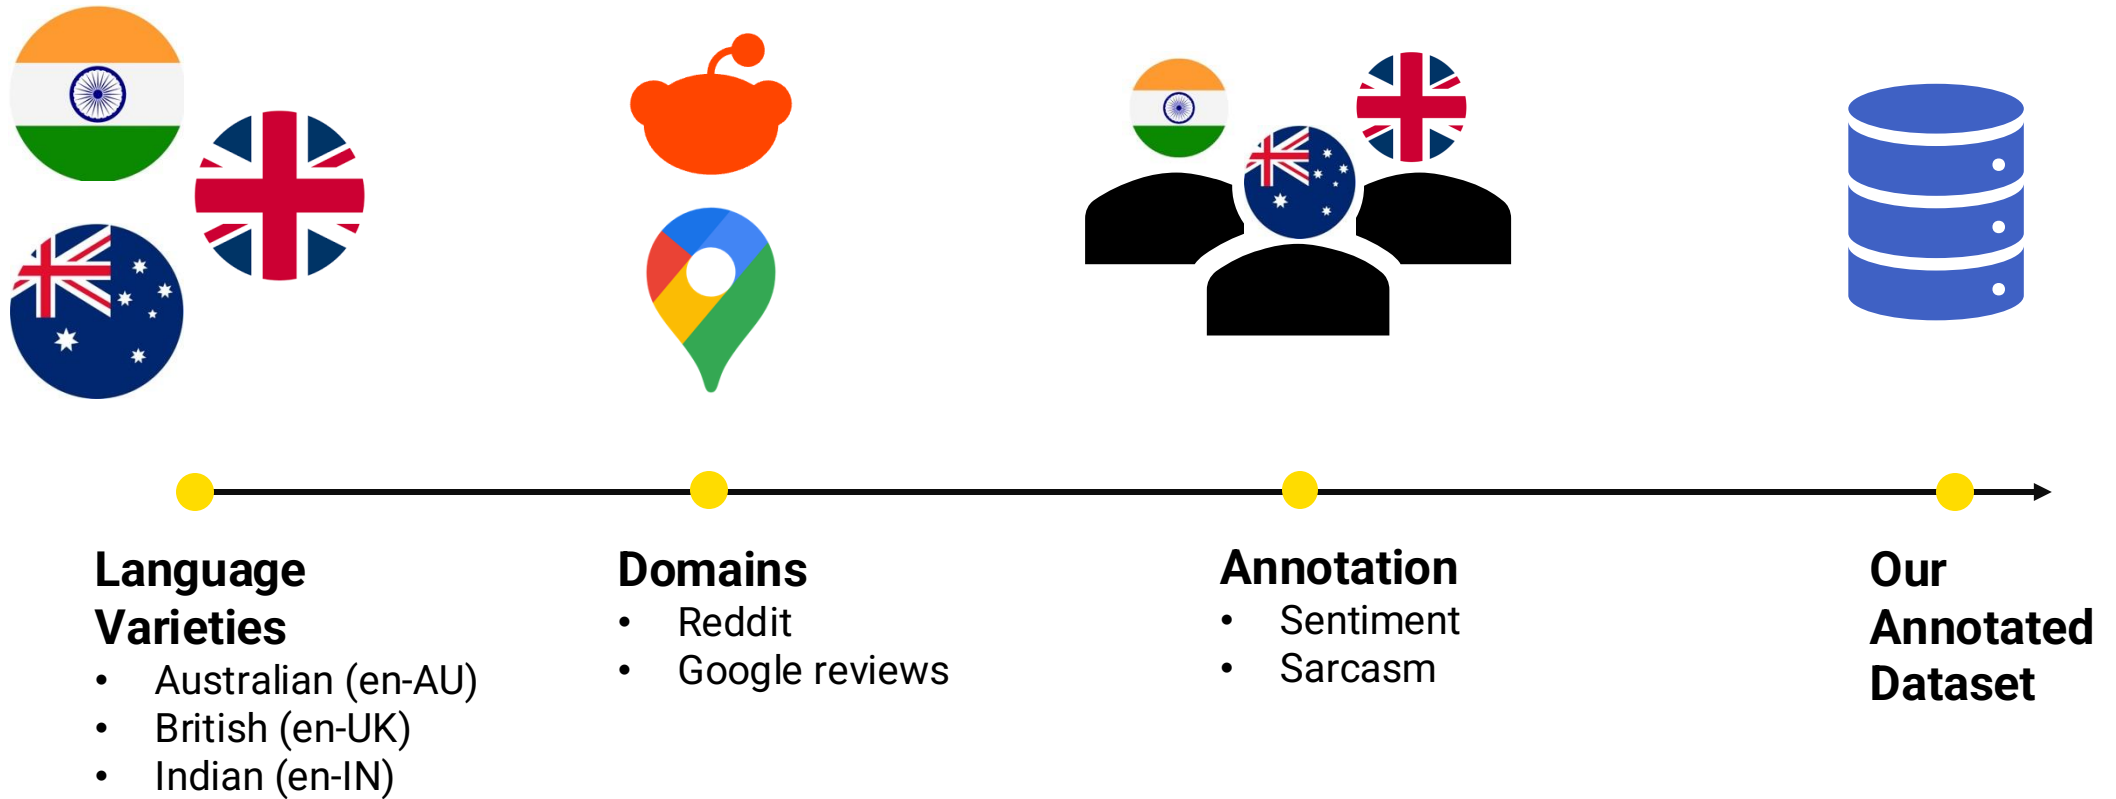

Domains

- Reddit
- Google reviews

How we created the dataset for this benchmark

How we created the dataset for this benchmark

Dataset Statistics

Variety	Domain	Total Samples	%Samples with Positive Sentiment	%Samples with Positive Sarcasm	Avg. Language Probability	Avg. Number of Words
en-AU	Google	1346	73%	7%	0.99	64.0
	Reddit	2505	32%	42%	0.98	51.7
en-IN	Google	2342	75%	1%	0.99	44.3
	Reddit	2395	25%	13%	0.87	26.9
en-UK	Google	2582	75%	0%	0.99	72.2
	Reddit	1432	12%	22%	0.98	38.0

We annotate a combined total of **12,602** across all varieties and domains for both the tasks.

UNSW HREC Approval#: iRECS6514
