Hi,

I am sorry I am a little bit behind - but almost caught up. According to this:

https://webcms3.cse.unsw.edu.au/COMP9322/21T3/outl... (https://webcms3.cse.unsw.edu.au/COMP9322/21T3/outline)

It means we could present lab2 in week 5 - e.g. lab2 activity deadline is week 5.But from what I can tell now that I've watched the lectures, this is not true and in week5 we should present lab3.

This means I've missed presenting lab1 and lab2, and will focus on lab3 - but can I please check I won't fail the entire subject? It's unclear if the 5/6 lab submissions is mandatory, if I will just lose some marks.

Thanks and sorry!

Brendan

Hi Brendan,

I can see where you got confused about lab deadlines. Let me explain to you with an example.

The order of lab deadlines is that: in week X we say here is the activity Y you need to do/deliver. You CAN present your activity Y in week X, BUT the deadline for activity Y is one week after (week X+1). For example, in week 5 we explained the activity 3, but that doesn't mean that you should present activity 3 in the following Thursday/Friday labs. You need one week to work on the activity and then present it. In week 5, we expect you to present your activity 2 work; that's the deadline for that activity. If someone wants to present their activity 3 in week 5, they can do it too of course, it's up to them. If you finish activities earlier, then why not present it earlier. Hope it makes sense now, but please let me know if it's still not clear.

You won't fail the course only because you missed two labs. Labs are only 10% of the total course mark. Regarding the 5 out of 6 lab submissions, it gives an opportunity to those that want to get the highest possible mark from the lab activities.
